Council Chambers
11710 Telegraph Road
Santa Fe Springs, CA 90670

Richard J. Moore, Mayor
William K. Rounds, Mayor Pro Tem
Jay Sarno, Councilmember
Juanita Trujillo, Councilmember
Joe Angel Zamora, Councilmember

Public Comment: The public is encouraged to address City Council on any matter listed on the agenda or on any other matter within its jurisdiction. If you wish to address the City Council, please complete the card that is provided at the rear entrance to the Council Chambers and hand the card to the City Clerk or a member of staff. City Council will hear public comment on items listed on the agenda during discussion of the matter and prior to a vote. City Council will hear public comment on matters not listed on the agenda during the Oral Communications period.

Pursuant to provisions of the Brown Act, no action may be taken on a matter unless it is listed on the agenda, or unless certain emergency or special circumstances exist. The City Council may direct staff to investigate and/or schedule certain matters for consideration at a future City Council meeting.

Americans with Disabilities Act: In compliance with the ADA, if you need special assistance to participate in a City meeting or other services offered by this City, please contact the City Clerk's Office. Notification of at least 48 hours prior to the meeting or time when services are needed will assist the City staff in assuring that reasonable arrangements can be made to provide accessibility to the meeting or service.

Please Note: Staff reports, and supplemental attachments, are available for inspection at the office of the City Clerk, City Hall, 11710 E. Telegraph Road during regular business hours 7:30 a.m. – 5:30 p.m., Monday – Thursday and every other Friday. Telephone (562) 868-0511.

Monthly Report on the Status of Debt Instruments Issued through the City of Santa Fe Springs Public Financing Authority (PFA)

RECOMMENDATION

That the Public Financing Authority receive and file the report.

BACKGROUND

The Santa Fe Springs Public Financing Authority (PFA) is a City entity that has periodically issued debt for the benefit of the Santa Fe Springs community. The following is a brief status report on the debt instruments currently outstanding that were issued through the PFA.

Consolidated Redevelopment Project 2001 Tax Allocation Refunding Bonds

Financing proceeds available for appropriation at 6/30/16	None
Outstanding principal at 6/30/16	\$13,965,000

Consolidated Redevelopment Project 2002 Tax Allocation Refunding Bonds

Financing proceeds available for appropriation at 6/30/16	None
Outstanding principal at 6/30/16	\$5,150,000

Consolidated Redevelopment Project 2003 Taxable Tax Allocation Refunding Bonds

Financing proceeds available for appropriation at 6/30/16	None
Outstanding principal at 6/30/16	\$2,775,000

Water Revenue Bonds, 2005 Series A

Financing proceeds available for appropriation at 6/30/16	None
Outstanding principal at 6/30/16	\$2,140,000

Consolidated Redevelopment Project 2006-A Tax Allocation Bonds

Financing proceeds available for appropriation at 6/30/16	None
Outstanding principal at 6/30/16	\$36,713,999

Consolidated Redevelopment Project 2006-B Taxable Tax Allocation Bonds

Financing proceeds available for appropriation at 6/30/16	None
Outstanding principal at 6/30/16	\$7,085,000

Consolidated Redevelopment Project 2007-A Tax Allocation Refunding Bonds

Financing proceeds available for appropriation at 6/30/16	None
Outstanding principal at 6/30/16	\$33,395,000

Report Submitted By: Travis Hickey
Finance and Administrative Services

Date of Report: July 21, 2016

ITEM NO. 3B

Bond Repayment

The City budget includes sufficient appropriations and adequate revenues are expected to be collected to meet the debt service obligations associated with the 2005 Water Revenue Bonds.

The former Community Development Commission (CDC) issued a number of tax allocation bonds before it was dissolved by State law effective February 1, 2012 and is administered by the City acting as Successor Agency under the oversight of the appointed Oversight Board. The Successor Agency no longer receives tax increment. Instead distributions from the Redevelopment Property Tax Trust Fund (RPTTF) are received based on approved obligations. It is anticipated that sufficient allocations from the RPTTF will continue to be made to the Successor Agency to meet ongoing debt service obligations.

Unspent Bond Proceeds

Under an approved Bond Expenditure Agreement, unspent bond proceeds of the former CDC in the amount of approximately \$19 million were transferred to the City in July 2014. The funds are to be spent in accordance with the original bond documents. The unspent proceeds continue to be a source of funding within the City's capital improvement program (CIP).

Thaddeus McCormack
City Manager/Executive Director

NEW BUSINESS

Monthly Report on the Status of Debt Instruments Issued through the City of Santa Fe Springs Water Utility Authority (WUA)

RECOMMENDATION

That the Water Utility Authority receive and file the report.

BACKGROUND

The Santa Fe Springs Water Utility Authority (WUA) is a City entity that has issued debt for the benefit of the Santa Fe Springs community. The following is a brief status report on the debt instruments currently outstanding that were issued through the WUA.

Water Revenue Bonds, 2013

Financing proceeds available for appropriation at 6/30/16	None
Outstanding principal at 6/30/16	\$6,890,000

In May 2013 the Water Utility Authority issued the 2013 Water Revenue Bonds in the amount of \$6,890,000. The bonds refunded the existing 2003 Water Revenue Bonds (issued through the Public Financing Authority) and provided additional funds for water improvement projects in the amount of \$2,134,339. The funds were restricted for use on water system improvements. In August 2013 the Water Utility Authority Board appropriated the proceeds for the Equipping Water Well No. 12 Project and all proceeds were since used on this project.

The City budget includes sufficient appropriations and adequate revenues are expected to be collected to meet the debt service obligations associated with the 2013 Water Revenue Bonds.

The WUA was formed in June of 2009. Water revenue bonds issued prior to this date were issued through the City of Santa Fe Springs Public Financing Authority.

Water Utility Authority Meeting

July 28, 2016

NEW BUSINESS

Status Update of Water-Related Capital Improvement Projects

RECOMMENDATION

That the Water Utility Authority receive and file the report.

BACKGROUND

This report is for informational purposes only. The following is a listing of current active water projects.

New Well Siting Study, Zone 1

Currently the City is under contract with Richard Slade and Associates (RCS) to provide a well siting study within zone no. 1. Currently RCS is conducting a capture zone study in anticipation of a new water production within zone 1. The capture zone study will be utilized as information to present to the State Water Resources Control Board in building a case for suitable well locations that will not influence current or future ground water contamination cleanup activities.

Engineering Design Services Water Treatment System Water Well No. 12

On a separate item as part of the agenda, staff are recommending awarding a contract to CIVILTECH Engineering, Inc. to provide engineering design services for a water treatment system at Water Well No. 12.

FISCAL IMPACT

The Water Well Siting Study for Zone 1 and for Water Well No. 12 will be funded by the UUT Capital Improvement Funds.

UNFINISHED BUSINESS

8. Adoption of Two-Year (FY 2016-17 and FY 2017-18) City Budget, Including Actions as Set Forth in the Recommendations Contained Herein

Recommendation: That the City Council:

- Adopt a Two-Year (FY 2016-17 and FY 2017-18) City Budget as proposed, including the actions as set forth herein.

Mayor Moore called on Thaddeus McCormack, City Manager to provide an introduction to the item.

Mr. McCormack expressed the hard work that was placed with compiling the budget.

Jose Gomez, Assistant City Manager/Finance Director provided a brief PowerPoint presentation on the item. He spoke about the following:

- General Fund
- General Fund Reserve Calculation

Mr. McCormack added the information about the money that came in through the trust funds, also stated that the law requires us to move 20% to the housing funds.

He also noted that Council Member Zamora inquired how the funds could be used towards housing.

Mr. Skolnik addressed Council Member Zamora's question.

Mayor Moore inquired if the funds can be used for home repair. Mr. McCormack stated it can be used for home repair.

Mr. McCormack continued the budget presentation. He spoke about:

- Personnel Recommendation: Reclassifying employees
- Spoke about bringing back the fee item on the July 14th meeting.

Council Member Trujillo inquired whether we are using the taxi services anymore. Mr. McCormack stated that we are no longer using the service.

Mayor Moore inquired whether the estimate that was provided for revenues included surplus.

Mr. Gomez noted that it will not be included, that anything prior would be going to reserves. It will be available for resource in can Council would like to use it in the near future.

It was moved by Mayor Pro Tem Rounds, seconded by Council Member Sarno, to adopt a Two-Year (FY 2016-17 and FY 2017-18) City Budget as proposed, including the actions as set forth herein, by the following vote:

Ayes: Sarno, Trujillo, Zamora, Rounds, Moore

31. EXECUTIVE TEAM REPORTS

- Noe Negrete, Public Works Director spoke about the aquatic center improvements, he noted there was a new water pump installed as well as new umbrellas, machines, diving board was cleaned and new shower heads. Wished everyone a safe 4th of July.
- Mayor Moore inquired whether we receive any revenue from the vending machine at the pool area, Maricela Balderas, Community Services Director stated we receive 5% revenue.
- Wayne Morrell, Director of Planning spoke about the new building, Gelsons the Market; they were the product of the Los Angeles proposal of the board of directors meeting and the project of bringing investments to California. He noted the president for LA rams is looking for a 50 acre and Santa Fe Springs might be a potential city. Also mentioned the Advanced Manufacturing Tax Exemption of \$2,430,000 that allowed Santa Fe Springs plant to be competitive with Louisiana plant.
- Mayor Moore inquired if we grant exception. Mr. Morrell stated that we are not exempted; Thaddeus said it is the state portion.
- Dino Torres, Director of Police Services spoke about the low cost pet vaccination clinic that took place on July 13th at Santa Fe High School; Q & A at Veracruz, Tuesday June 28th
- Mike Crook, Fire Chief provided an update on the San Gabriel fire, he stated that there is currently a red flag warning and appreciates the support.
- Jose Gomez, Finance Director noted that they have issued the proposals for the new finance system. Will be bringing the item to council late summer for award.
- Maricela Balderas, Community Services Director showed demonstrated pictures of the June 10th movie event of The Good Dinosaur; spoke about the 3 on 3 tournament scheduled for June 17th at the activity center and the 1st toga party.

The following comments were made by the City Council:

- Council Member Zarno thanked staff and volunteers for all their hard work.
- Mayor Pro Tem Rounds stated that he was at Lakeview Park and was happy to see the renovations.
- Council Member Trujillo wished a happy Fourth of July to everyone, noted that the neighborhood will be patrolling, and hope they catch all illegal fireworks.
- Council Member Sarno thanked everyone and wished everyone a happy Fourth of July.
- Mayor Moore thanked staff for their hard work on the budget.

Recessed to closed session at 7:53p.m.

No action taken in closed session.

ADJOURNMENT

32. Mayor Moore adjourned the regular meetings at 8:23 p.m.

PUBLIC HEARING

Confirmation of 2015/16 Weed Abatement Charges

RECOMMENDATION

That the City Council confirm the charges listed in the Los Angeles County Agricultural Commissioners 2015/2016 Weed Abatement Assessment Roll and instruct the County Auditor to enter the amounts of these assessments against the respective parcels of land as they appear on the current assessment roll.

BACKGROUND

The City Council is being asked to confirm assessments against property for weed abatement charges. A copy of the Los Angeles County Agricultural Commissioner's 2015/2016 Weed Abatement Assessment Roll has been posted in City Hall since July 11, 2016.

The attached notice of charges was sent to all Santa Fe Springs property owners listed on the roll.

The Council should hear from anyone who wants to speak on this item. A representative of the County of Los Angeles Agricultural Commission will be in attendance to answer any questions you might have.

Los Angeles County Weed Abatement Charge List

REPORT ON THE COST OF WEED ABATEMENT

TO THE CITY COUNCIL OF SANTA FE SPRINGS

Council Member:

Pursuant to an order heretofore made by your Honorable Body instructing this Department to abate noxious or dangerous weeds and rubbish under the provisions of the Government Code, we respectfully submit the following report on the cost of abating such noxious weeds on each separate lot or parcel of land, showing the cost of removing such weeds on each separate lot or parcel of land, or in front thereof, or both, to-wit:

PUBLIC HEARING – RESOLUTION NO. 9520

Adoption of Resolution No. 9520 - Setting and Revising Development Fees

RECOMMENDATION

1. That the Mayor open the Public Hearing and hear from anyone wishing to speak on this matter;
2. That the City Council adopt Resolution No. 9520 - Setting and revising development fees.

BACKGROUND

As part of the City's budget preparation process, Staff worked closely with the City Council's Budget Revenue and Fees Subcommittee in reviewing the City's fees for potential adjustments. The objective was to ensure that fees adequately offset the City's cost of providing the services.

More specifically, within the City's comprehensive fee schedule there are defined construction development-related fees (in the Building/Planning, Fire, and Public Works Departments) that mandate a minimum 60-day period between the Council adoption date and the effective date of the new fees. Most of these fees were last adjusted six years ago (in FY 2010-11), with some last modified even prior to then. The proposed development fee schedule (see attached) includes adjustments for a number of services, as well as a select number of new service fees. For the majority of the adjustments, the proposed increase is approximately 3%. By comparison, the Consumer's Price Index (CPI) has risen almost 10% over the last six years. In short, the relatively modest fee adjustment will more adequately offset the City's cost of providing the services while still keeping them comparable to those in other communities.

Attached please find a copy of the proposed fee schedule (including the current fees). Given the 60-day period required between the Council adoption date and the effective date of the new fees, it is recommended that the effective date for the new fees is October 1, 2016. The City's other (non-development) fees are included in a separate agenda item for consideration this evening.

City of Santa Fe Springs

City Council Meeting

July 28, 2016

FISCAL IMPACT

The proposed fee adjustments will have a positive impact on the City's revenues. The precise budget effect is difficult to evaluate as it is dependent on the amount of development activity carried out.

Resolution No. 9520

Development Fees: Public Works/Planning/Fire

RESOLUTION NO. 9520

**A RESOLUTION OF THE CITY COUNCIL
OF THE CITY OF SANTA FE SPRINGS
SETTING AND REVISING DEVELOPMENT FEES**

The City Council of the City of Santa Fe Springs does resolve as follows:

Section 1: The City hereby establishes fees for the services set forth in the attached listing of fees in the "City of Santa Fe Springs' Fee Schedule for Fiscal Years 2016-17 and 2017-18" attached hereto, in the amounts set forth therein.

Section 2: Said fees shall be effective on October 1, 2016 and supersede all previously established fees for said services.

Section 3: Each of said fees does not exceed the actual and reasonable cost of providing the services for which each fee is charged.

Section 4: The City Clerk shall certify to the adoption of this Resolution.

PASSED, APPROVED AND ADOPTED THIS 28th day of July, 2016.

Mayor

PUBLIC HEARING

Alcohol Sales Conditional Use Permit Case No. 68

Request for approval to allow the operation and maintenance of an alcoholic beverage use involving the sale and storage of alcoholic beverages for on-site consumption at a banquet hall facility under the name of Azar Event Center located at 12215 Slauson Avenue, within the Light Manufacturing (M-1) Zone. (Ebriham Fassal for Azar Event Center)

RECOMMENDATION

Staff recommends that the City Council take the following actions:

1. Open the Public Hearing and receive any comments from the public regarding Alcohol Sales Conditional Use Permit Case No. 68, and thereafter close the Public Hearing.
2. Approve Alcohol Sales Conditional Use Permit Case No. 68 subject to the conditions of approval contained within this report.

BACKGROUND

The Applicant, Ebriham Fassal, is renowned for his catering services in the general area. Mr. Fassal owns and operates a restaurant in the City of Downey commonly known as Café n' Stuff. The Applicant has recently purchased the subject property located at 12215 Slauson Avenue to use as an auxiliary banquet hall/event center. Before the purchase, the property sat vacant for approximately three years due mainly because the property had some parking and zoning challenges, which discouraged other land use activities. At their regular meeting of March 14, 2016, the Planning Commission approved Mr. Fassal's request for Conditional Use Permit Case (CUP) No. 770, which granted approval for the banquet hall, and Modification Permit (MOD) Case No. 1265, which granted approval to use the property as a banquet hall facility with a modified parking plan.

City Ordinance No. 834, approved by the City Council on March 10, 1994, added Section 155.628 to the City Code requiring all businesses engaged in the sale, storage, or manufacture of any type of alcoholic beverage meant for on or off-site consumption to apply for and be granted a valid Alcohol Sales Conditional Use Permit (ASCUP).

In accordance with Section 155.628, Mr. Ebriham Fassal is requesting approval of Alcohol Sales Conditional Use Permit Case No. 68 to allow the operation and maintenance of an alcoholic beverage use for the sale of alcoholic beverages for on-site consumption. This matter was before the Planning Commission at their regular meeting of July 11, 2016. The Planning Commission recommended that the matter be submitted to the City Council for review and approval.

Report Submitted By: L. Collazo
Department of Police Services

Date of Report: July 22, 2016

The Applicant is concurrently transferring the ABC license (Type 41 On-Site Beer and Wine, and Type 58 Caterer's Permit) from his Downey restaurant to this location, and the Applicant is concurrently applying for an Entertainment Conditional Use Permit. If the ABC license transfer is denied, the Applicant will be allowed to seek alternative measures within a year's time before this Permit becomes null and void. It should be noted that alcoholic beverages are not, and will not be permitted to be brought in by the individuals renting the establishment.

STREETS AND HIGHWAYS

The subject site has frontage on Slauson Avenue and Chetle Avenue; Slauson Avenue is designated as a "Major Highway" within the Circulation Element of the City's General Plan while Chetle Avenue is designated as a local industrial street.

ZONING AND LAND USE

The subject site is within two zones; meaning that the majority of the property, including the portion developed with the existing building fronting Slauson Avenue is zoned Heavy Manufacturing (M-2), with the remainder of the property, fronting on Chetle Avenue, zoned Light Manufacturing (M-1). Properties to the south and west are zoned M-2, properties to the northwest are zoned M-1, and properties to the north east and east are within the City of Whittier and are zoned for manufacturing uses.

LEGAL NOTICE OF PUBLIC HEARING

This matter was set for a Public Hearing in accordance with the requirements of Sections 65090 and 65091 of the State Planning, Zoning and Development Laws and the requirements of Sections 155.860 through 155.864 of the City's Municipal Code.

Legal notice of the Public Hearing for the proposed Alcohol Sales Conditional Use Permit was sent via first class mail to all property owners within 500 feet of the subject property whose names and addresses appear on the latest County Assessor's Roll. The notices were mailed on June 30, 2016. Legal Notices were also posted in Santa Fe Springs City Hall, the City Library, and within the City Civic Center as required by the State Zoning and Development Laws and by the City's Zoning Regulations. A Notice was also published in the Whittier Daily Newspaper on June 30, 2016. To date, Staff has not received any inquiries regarding the request.

ZONING ORDINANCE REQUIREMENTS

Section 155.628 (B), regarding the sale or service of alcoholic beverages, states the following:

"A Conditional Use Permit shall be required for the establishment, continuation or enlargement of any retail, commercial, wholesale, warehousing or manufacturing

business engaged in the sale, storage or manufacture of any type of alcoholic beverage meant for on or off-site consumption. In establishing the requirements for such uses, the Planning Commission and City Council shall consider, among other criteria, the following:

- a. **Conformance with parking regulations.** *At their meeting of March 14, 2016, the Planning Commission approved MOD 1265. A Modification of the Property Development Standards to allow the applicant to not provide forty-two (42) of the required 151 parking spaces. The Applicant did show that they can provide and maintain 79 on-site parking stalls, and has secured parking agreements with two neighboring properties to allow his customers to park on their property. This will provide the subject business with thirty (30) additional parking stalls for a grand total of 109 stalls. A copy of the parking agreement letters and a site plan have been attached to this report. A copy of the reference MOD Permit Staff Report is available upon request.*
- b. **Control of vehicle traffic and circulation.** *The subject property has on-site vehicle circulation with ingress and egress driveways on Slauson Avenue and Chettle Avenue. Driveways are called out on the attached site plan.*
- c. **Hours and days of operation.** *The Applicant states that the hours of operation will be conducted between the hours of 3:00 p.m. to 10:00 p.m. Monday through Thursday, and 3:00 p.m. to 1:00 a.m. Friday through Sunday. Pursuant to the Planning Commission's recommendation, the Applicant will cease the sale of alcoholic beverages thirty (30) minutes before closing time. The Applicant agreed to the recommendation.*
- d. **Security and/or law enforcement plans.** *As part of the conditions of approval, the Applicant is required to submit and maintain an updated Security Plan.*
- e. **Proximity to sensitive and/or incompatible land uses, such as schools, religious facilities, recreational or other public facilities attended or utilized by minors.** *The subject property is approximately half a mile to York Field, a baseball park utilized by minors and adults. Moreover, there are two high schools within approximately one-mile from the location (Sierra High School and St. Paul High School). There are no churches within the subject site, but it should be noted that St. Paul High School is a Catholic private school which maintains an on-site chapel.*
- f. **Proximity to other alcoholic beverage uses to prevent the incompatible and undesirable concentration of such uses in an area.** *The subject property is located more than a three-quarter-mile from another establishment (Chevron Gas Station) which sells alcoholic beverages. The establishment is also in the City of*

Santa Fe Springs operating with an approved alcohol sales conditional use permit. ABC does not recognize the two establishments as a concern for over-saturation or incompatible uses.

- g. Control of noise, including noise mitigation measures.** *The proposed use is also operating under Conditional Use Permit Case No. 770, approved by the Planning Commission on March 14, 2016, and is concurrently requesting approval of an Entertainment Permit. As a result, conditions have been authored to mitigate any potential noise generated by the subject use. The Commission should note that this activity and all other activities in the City are subject to Sections 155.421-155.425 of the City Codes pertaining to noise.*
- h. Control of littering, including litter mitigation measures.** *As part of the conditions of approval, the Applicant, and/or his employees, is required to maintain the property free of trash and debris; moreover, the City's Property Maintenance Ordinance prohibits trash and debris on any property within the City.*
- i. Property maintenance.** *As part of the conditions of approval, the Applicant is required to maintain the immediate area in compliance with the City's Property Maintenance Ordinance.*
- j. Control of public nuisance activities, including, but not limited to, disturbance of the peace, illegal controlled substances activity, public drunkenness, drinking in public, harassment of passersby, gambling, prostitution, sale of stolen goods, public urination, theft, assaults, batteries, acts of vandalism, loitering, curfew violations, sale of alcoholic beverages to a minor, lewd conduct or excessive police incident responses resulting from the use.** *Staff has generated conditions of approval to mitigate or fully eliminate these negative impacts before they become a public nuisance. It should be noted that some of the listed activities are out of the control of the Applicant and/or his employees, but the Applicant is aware that he or his employees are to contact the Whittier Police whenever they see any of the listed activities take place.*

STAFF COMMENTS

As with all alcohol conditional use permit applications, Staff has visited the site and the Applicant's other businesses to ensure compliance with other regulatory ordinances and codes. Staff is recommending that the City Council approve the request for Alcohol Sales Conditional Use Permit Case No. 68 subject to the listed conditions set forth herein. Staff has conditioned that within one-year of the approval date of this Permit, a compliance review report shall be prepared and submitted to the Planning Commission for their review.

CONDITIONS OF APPROVAL

1. That the Applicant understands and accepts that this Permit is solely for the sale of alcoholic beverages in relationship with a bona-fide banquet hall/event use and that this Permit shall become void and terminated if the banquet hall/event use is terminated, closed, or modified to another type of use.
2. That the Applicant shall comply with the Conditions of Approval set forth in Conditional Use Permit (CUP) Case No. 770 and Modification Permit (MOD) Case No. 1265, and that if CUP Case No. 770 and/or MOD Case No. 1265 are revoked or terminated, this Permit is also subject to termination unless the Applicant can show that the replacing use can legally permit the sale of alcohol. Copies of the conditions are available upon request.
3. That it shall be the responsibility of the Applicant and/or his employees to monitor outdoor consumption of alcoholic beverages; consumption of alcoholic beverages is not permitted outside. Signs shall be placed in a conspicuous area to notify customers that consumption of alcoholic beverages within the parking area is prohibited at all times.
4. That the sale of alcoholic beverages shall only be permitted during the normal business hours of the week, or as required by the Alcohol Beverage Code.
5. That the Type 41 Alcoholic Beverage License, allowing the on-site sale of alcoholic beverages in connection with a public eating establishment shall be restricted to the sale for consumption of alcohol beverages on the subject site only; the use shall not sell alcoholic beverages for transport and/or for consumption outside or off the subject premise.
6. That it shall be the responsibility of the ownership to ensure that all alcoholic beverages purchased on the subject site shall be consumed within the business establishment; all stored alcoholic beverages shall be kept in a locked and secured area that is not accessible to patrons.
7. That the applicant shall be responsible for maintaining control of their litter/trash on the subject property and gather any that may migrate onto adjacent properties as a result of the business. This may be controlled by installing trash receptacles within strategic areas.
8. That the applicant and/or his employees shall not allow any person who is intoxicated, or under the influence of any drug, to enter, be at, or remain upon the licensed premises, as set forth in Section 25602(a) of the Business and Professions Code.

9. That the applicant and/or his employees shall not sell, furnish, or give any alcohol to any habitual drunkard or to any obviously intoxicated person, as set forth in Section 25602 (a) of the State Business and Professions Code.
10. That the applicant shall not have upon the subject premises any alcoholic beverage(s) other than the alcoholic beverage(s) which the licensee is authorized to sell under the license, as set forth in Section 25607 (a) of the State Business and Professions Code.
11. That the applicant and/or any of his employees shall not sell, furnish, or give any alcoholic beverage to any person under 21 years of age, as set forth in Section 25658 (a) of the State Business and Professions Code.
12. That solicitation of drinks is prohibited; that is, an employee of the licensed premises shall not solicit alcoholic beverages to its customers. Refer to Section 303 of the California Penal Code and Section 25657 of the Business and Professions Code.
13. That vending machines, water machines, pay telephones and other similar equipment shall not be placed outdoors whereby visible from the street or adjacent properties.
14. That all buildings, structures, walls, fences, and similar appurtenances shall be maintained in good appearance and condition at all times.
15. That streamers, pennants, whirling devices or other similar objects that wave, float, fly, rotate or move in the breeze shall be prohibited. Banners may be displayed with prior approval and permits.
16. That the façade windows shall be free of advertisements, marketing devices, beer logos, menus, signs, and/or any other displays. Upon approval by the Department of Planning, 25% of the window space area may be used for temporary displays.
17. That a copy of these conditions shall be posted and maintained with a copy of the City Business License, in a place conspicuous to all employees of the location.
18. That the Applicant shall install and maintain a video recording surveillance system with the following minimum configuration: Cameras capable of recording in HD at 5Mbps to capture 1080P video at 30 FPS, and a Network Video Recorder (NVR) which can record at 1080P video per channel. The Applicant shall maintain the video cameras and shall allow the Director of Police Services, Whittier Police Officers, and any of their representatives to view the security surveillance video footage immediately upon their request.

19. That the applicant and/or his employees shall not allow any person to loiter on the subject premises, shall report all such instances to the Whittier Police Department; and, shall post signs, as approved by the Department of Police Services, prohibiting loitering.
20. That Alcohol Sales Conditional Use Permit Case No. 68 shall not be valid until approved by the City Council and shall be subject to any other conditions the City Council may deem necessary to impose.
21. That security personnel, as well as the owner, corporate officers and managers, shall cooperate fully with all city officials, law enforcement personnel, and code enforcement personnel, and shall not obstruct or impede their entrance into the licensed premises while in the course of their official duties.
22. That in the event the applicant intends to sell, lease or sublease the subject business operation or transfer the subject Permit to another owner/applicant or licensee, the Director of Police Services shall be notified in writing of said intention within a reasonable time of the intent of signing an agreement to sell lease or sublease.
23. That this permit is contingent upon the approval by the Department of Police Services of an updated security plan which shall address the following for the purposes of minimizing risks to the public health, welfare, and safety. The Security Plan shall be submitted to the Department of Police Services within 60 days from the approval of this permit with the following information:
 - (A) A description of the storage and accessibility of alcoholic beverages on display, as well as surplus alcoholic beverages in storage;
 - (B) A description of crime prevention barriers in place at the subject premises, including, but not limited to: placement of signage, landscaping, ingress and egress controls, security systems, and site plan layouts;
 - (C) A description of how the applicant plans to educate employees on their responsibilities; actions required of them with respect to enforcement of laws dealing with the sale of alcohol to minors; and, the conditions of approval set forth herein;
 - (D) A business policy requiring employees to notify the Police Services Center of any potential violations of law or this Conditional Use Permit, occurring on the subject premises, and the procedures for such notifications.

- (E) The City's Director of Police Services may, at his discretion, require amendments to the Security Plan to assure the protection of the public's health, welfare, and safety.
24. That ASCUP Case No. 68 shall be subject to a compliance review inspection in one (1) year, no later than July 28, 2017, to ensure the premise is still operating in strict compliance with the original conditions of approval. At which time the applicant may request an extension of the privileges granted herein, provided that the use has been continuously maintained in strict compliance with these conditions of approval. A compliance review report showing Staff's findings shall be prepared and submitted to the Planning Commission within the July 28, 2017, date.
25. That all other applicable requirements of the City Zoning Ordinance, Uniform Building Code, Uniform Fire Code, the determinations of the City and State Fire Marshall, the security plan and all other applicable regulations shall be strictly complied with.
26. It is hereby declared to be the intent, that if any provision of this permit is violated or held to be invalid, or if any law, statute, or ordinance is violated, this Permit shall be subject to the revocation process at which time, the Permit may become terminated and the privileges granted hereunder shall lapse.

Re: Parking Area
12275 Slauson Avenue
Whittier, CA 90606

Dear Planning Commission Members:

This notice is to confirm that PIH Health and Azar Event Center have agreed to a non-binding Letter of Intent ("LOI") to lease parking spaces to be utilized by the Event Center after business hours on specified dates and time (shown below). Terms and conditions of the lease will be finalized upon approval by both parties.

General Terms are as follows:

PREMISES: Approximately 10 parking stalls as shown on the attached site plan for informational purposes only and marked **Exhibit A**

LANDLORD: InterHealth Corp., dba PIH Health
a California not for profit company
12401 Washington Blvd.
Whittier, CA 90601

(562) 698-0811 ext 14863 Telephone
(562) 789-4423 Facsimile

TENANT: Azar Event Center

12401 Washington Blvd.
Whittier, CA 90602-1006
T: 562-698-0811

Hearing Impaired
TTD: 562-696-9267
PIHHealth.org

PERMITTED USE: Subject to governing documents, as may be amended by Landlord from time to time, existing leases and prohibited uses and exclusives, the Premises shall be used for the purpose of customer parking and for no other use or purpose. Tenant shall operate the Premises continuously and without interruption.
Permitted use will be for Weekends Only (Fri - Sunday) 5pm until 1am

INITIAL TERM: 3 Year (3) years from the Rent Commencement Date

RENT COMMENCEMENT: Upon issuance of Certificate of Occupancy

ASSIGNMENT/SUBLET: Tenant shall have no right to assign or sublease the Premises under any condition without Landlord's consent, which consent may be withheld in Landlord's sole, exclusive and non-reviewable discretion. No assignment or sublease shall release Tenant from liability.

PARKING AREAS: Tenant accepts the parking areas in their "as is, whereas" and Tenant accepts such areas as adequate for Permitted Use.

COMMISSIONS: None. Neither Landlord nor Tenant is represented by a broker in this transaction.

LEASE FORM: Landlord's standard lease document.

This offer is not to be considered a contractual obligation. Any firm obligation of either party is subject to the negotiation of a definitive lease agreement fully-executed by both parties.

PUBLIC HEARING

Entertainment Conditional Use Permit Case No. 16

Request for approval to conduct and maintain an entertainment use involving an indoor banquet hall facility operating under the name of Azar Event Center located at 12215 Slauson Avenue, within the Light Manufacturing (M-1) Zone. (Ebriham Fassal for Azar Event Center.

RECOMMENDATION

Staff recommends that the City Council take the following actions:

1. Open the Public Hearing and receive any comments from the public regarding Entertainment Conditional Use Permit Case No. 16, and thereafter close the Public Hearing.
2. Approve Entertainment Conditional Use Permit Case No. 16 subject to the conditions of approval contained within this report.

BACKGROUND

The Applicant, Ebriham Fassal, is renowned for his catering services in the general area. Mr. Fassal owns and operates a restaurant in the City of Downey commonly known as Café n' Stuff. The Applicant has recently purchased the subject property located at 12215 Slauson Avenue to use as an auxiliary banquet hall/event center. Before the purchase, the property sat vacant for approximately three years due mainly because the property had some parking and zoning challenges discouraging other land use activities. At their regular meeting of March 14, 2016, the Planning Commission approved Mr. Fassal's request for Conditional Use Permit Case (CUP) No. 770, which granted approval to use the property as a banquet facility, and Modification Permit (MOD) Case No. 1265, which granted approval to use the property with a modified parking plan.

While it is common to have entertainment during festive events, Section 155.723 provides that all businesses conducting entertainment shall first obtain approval of an Entertainment Conditional Use Permit by the City Council. In accordance with Section 155.723, the Applicant is requesting approval of Entertainment Conditional Use Permit Case No. 16 to allow live entertainment and disc jockeys. Concurrent with this request, the applicant is seeking approval of an alcohol sales conditional use permit for the sale of alcoholic beverages for on-site consumption.

This matter was before the Planning Commission at their regular meeting of July 11, 2016. The Planning Commission recommended that the matter be submitted to the City Council for review and approval.

STREETS AND HIGHWAYS

The subject site has frontage on Slauson Avenue and Chetle Avenue; Slauson Avenue is designated as a "Major Highway" within the Circulation Element of the City's General Plan while Chetle Avenue is designated as a local industrial street.

ZONING ORDINANCE REQUIREMENTS

Section 155.723 of the Santa Fe Springs Zoning Ordinance requires a Conditional Use Permit approval for "entertainment, amusement, dance halls and other uses as defined in Section 155.003."

LEGAL NOTICE OF PUBLIC HEARING

This matter was set for a Public Hearing in accordance with the requirements of Sections 65090 and 65091 of the State Planning, Zoning and Development Laws and the requirements of Sections 155.860 through 155.864 of the City's Municipal Code.

Legal notice of the Public Hearing for the proposed Entertainment Conditional Use Permit was sent via first class mail to all property owners within 500 feet of the subject property whose names and addresses appear on the latest County Assessor's Roll. The notices were mailed on June 30, 2016. Legal Notices were also posted in Santa Fe Springs City Hall, the City Library, and within the Civic Center as required by the State Zoning and Development Laws and by the City's Zoning Regulations. A Notice was also published in the Whittier Daily Newspaper on June 30, 2016. To date, Staff has not received any inquiries regarding the proposal.

STAFF COMMENTS

Staff has conducted several inspections of the location as a result of the requested entitlements. Based on its findings, Staff believes that the proposed use does not pose a negative impact on the surrounding area. Moreover, Staff believes that allowing entertainment as an auxiliary use at the banquet hall will not pose a risk or nuisance to patrons or the general public if the entertainment activities are conscientiously conducted in strict compliance with the Conditions of Approval.

CONDITIONS OF APPROVAL

1. That the Applicant understands and accepts that this Permit is solely granted to allow entertainment for a bona-fide banquet hall/event use and that this Permit shall become void and terminated if the banquet hall/event use is terminated, closed, or modified to another type of use.
2. That the Applicant shall comply with the Conditions of Approval set forth in Conditional Use Permit (CUP) Case No. 770, Modification Permit (MOD) Case No. 1265, and ASCUP Case No. 68. Copies of these reports are available upon request.

3. That the Applicant shall install and maintain a video recording surveillance system with the following minimum configuration: Cameras capable of recording in HD at 5Mbps to capture 1080P video at 30 FPS, and a Network Video Recorder (NVR) which can record at 1080P video per channel. The Applicant shall maintain the video cameras and shall allow the Director of Police Services, Whittier Police Officers, and any of their representatives to view the security surveillance video footage immediately upon their request.
4. That mosh pits, mosh dancing, and slam-type dancing is prohibited, and management shall remove patrons from the premises who initiate, or participate in such activity or other similar type of activity.
5. That equipment, decorations, props or other similar ornaments shall not interfere with interior doors, emergency exits or emergency access at all times. Pyrotechnics of any type are strictly prohibited at all times.
6. That alcoholic beverage related games and/or contests are prohibited and management shall remove patrons from the premises who initiate or participate in such activity or other similar type of activity.
7. That the Applicant shall be responsible for maintaining control of litter on the subject property and the adjoining properties, within the parking areas, and parkways.
8. That, as a minimum standard, during the closing time and 30 minutes after the established closing time, the applicant/licensee shall provide a security guard whose sole purpose is to patrol the parking lot and around the establishment to maintain order therein; and prevent any illicit or nuisance activity, including activity that could interfere with the quiet and calm of nearby residents or businesses.
9. That it shall be unlawful for any person who is intoxicated or under the influence of any drug, to enter, be at, or remain upon the licensed premises as set forth in Section 25602(a) of the Business and Professions Code.
10. That the security personnel shall not perform any law enforcement functions. Security personnel shall report immediately to the Whittier Police Department all incidents in which a person could be charged with a misdemeanor or a felony offense.
11. That security personnel, as well as the owner, corporate officers and managers shall cooperate fully with all city officials, law enforcement personnel, and code enforcement personnel and shall not obstruct or impede their entrance into the

licensed premises while in the course of their official duties.

12. That no change or alterations to the approved entertainment format or content shall occur without prior written approval from the Director of Police Services.
13. That all existing exit signs shall continue to be maintained and illuminated at all times per California Fire Code 2501.15.
14. That exit doors are not to be blocked at any time.
15. That a copy of these conditions shall be posted and maintained with a copy of the City Business License and Fire Department Permits, and shall be located in a place conspicuous to all employees of the location.
16. That the Applicant shall provide adequate professional security for the entertainment provided or any special event and/or private parties.
17. That failure to comply with the foregoing conditions shall be cause for suspension and/or revocation of this Permit.
18. That in the event the Applicant intends to sell, lease or sublease the subject business, or transfer the subject Permit to another party, the Director of Police Services shall be notified in writing within sixty (60) days prior to signing of the agreement to sell, lease, or sublease the business.
19. That this Permit shall be subject to a compliance review inspection in one year, no later than July 28, 2017, to ensure the entertainment activity is still operating in strict compliance with the original conditions of approval. At which time the Applicant may request an extension of the privileges granted herein, provided that the use has been continuously maintained in strict compliance with these conditions of approval. A compliance review report showing Staff's findings shall be prepared and submitted to the Planning Commission within the July 28, 2017, date.
20. That Entertainment Conditional Use Permit Case No. 16 shall not be valid until approved by the City Council and shall be subject to any other conditions the City Council may deem necessary to impose.
21. That vending machines, water machines, pay telephones and other similar equipment shall not be placed outdoors whereby visible from the street or adjacent properties.

22. That streamers, banners, pennants, whirling devices or similar objects that wave, float, fly, rotate or move in the breeze shall be prohibited unless approved by the Director of Planning.
23. That the owner/operator shall comply with all Federal, State and local requirements and regulations included, but not limited to, the Santa Fe Springs City Municipal Code, Uniform Building Code, Uniform Fire Code and all other applicable codes and regulations.
24. It is hereby declared to be the intent that if any provision of this permit is violated or held to be invalid, or if any law, statute or ordinance is violated, the Permit shall be void and the privileges granted hereunder shall lapse.

NEW BUSINESS

Adoption of the City Comprehensive Fee Schedule for FY 2016-17 and FY 2017-18

RECOMMENDATION

That the City Council adopt the fees for services as included in the Comprehensive City Fee Schedule for FY 2016-17 and FY 2017-18.

This item is similar to the development fees item presented earlier, with this item addressing the City's non-development fees.

BACKGROUND

As part of the City's budget preparation process Staff worked closely with the City Council's Budget Revenue and Fees Subcommittee in reviewing the City's fees for potential adjustments. The objective was to ensure that fees adequately offset the City's cost of providing the services.

Many of these fees were last adjusted six years ago (in FY 2010-11), with some last modified even prior to then. The proposed fee schedule (see attached) includes adjustments for a number of services, as well as a select number of new service fees. For the many of the adjustments, the proposed increase is approximately 3%. By comparison, the Consumer's Price Index (CPI) has risen almost 10% over the last six years. In short, the relatively modest fee adjustment will more adequately offset the City's cost of providing the services while keeping them comparable to those in other communities.

Unlike development fees (which are also listed in the comprehensive fee schedule), there is no mandated period required between the Council adoption date and the effective date for the new non-development fees. If approved, it is recommended that the new fees become effective immediately, with one exception. Because the annual invoices for Fire Environmental fees are mailed prior to the start of the fiscal year, it is recommended that those proposed fees have an effective date of July 1, 2017.

FISCAL IMPACT

The proposed fee adjustments will have a positive impact on the City's revenues. The precise budget effect is difficult to evaluate as it is dependent on the amount of activity carried out.

City Council Meeting

July 28, 2016

NEW BUSINESS

Parkmead Street Rehabilitation – Authorization to Advertise for Construction Bids

RECOMMENDATION

That the City Council take the following actions:

1. Approve the Plans and Specifications; and
2. Authorize the City Engineer to advertise for construction bids.

BACKGROUND

The Parkmead Street Rehabilitation project was added to the Capital Improvement Plan during the March 24, 2016 City Council meeting.

The Parkmead Street Rehabilitation project consists of removing the existing pine trees and replacing them with a non-intrusive tree species. The existing roots have damaged the roadway surface and created major issues with drainage by uplifting the curb and gutter. Roadway rehabilitation work includes; removal of existing asphalt concrete/macadam pavement surface, reworking the underlying aggregate base and in situ soil materials to provide a firm and stable platform for placing new asphalt concrete pavement thereon, and the removal and replacement of curb and gutter, sidewalks and driveways.

The estimated construction cost of the Parkmead Street Rehabilitation project is \$550,000. The total project cost including construction, engineering and inspection, and contingency is \$826,000. The estimate is derived from the most current cost of similar street rehabilitation project. The total project cost breakdown is itemized below:

<u>ITEM</u>	<u>BUDGET</u>
Construction:	\$ 550,000
Engineering:	\$ 75,000
Inspection:	\$ 60,000
Contingency:	\$ 141,000
Total Construction Cost:	\$ 826,000

The project Plans and Specifications are complete and the Public Works Department is ready to advertise for the construction bids for this project, upon City Council approval. A copy of the project specifications will be on file with the City Clerk.

Report Submitted By: Noe Negrete, Director
Department of Public Works

Date of Report: July 21, 2016

ITEM NO. 12

FISCAL IMPACT

The Parkmead Street Rehabilitation project is fully funded through the UUT Capital Improvement Project Fund.

INFRASTRUCTURE IMPACT

The rehabilitation work will improve the structural condition of the existing roadway, enhance operational safety and reduce maintenance costs moving forward.

Bartley Avenue Street Rehabilitation – Authorization to Advertise for Construction Bids

RECOMMENDATION

That the City Council take the following actions:

1. Approve the Plans and Specifications; and
2. Authorize the City Engineer to advertise for construction bids.

BACKGROUND

The Bartley Avenue Street Rehabilitation project consists of the removal of existing asphalt concrete/macadam pavement surface, reworking the underlying aggregate base and in situ soil materials to provide a firm and stable platform for placing new asphalt concrete pavement thereon, and the removal and replacement of curb and gutter, sidewalks and driveways.

The estimated construction cost of the Bartley Avenue Street Rehabilitation project is \$615,500. The total project cost including construction, engineering and inspection, and contingency is \$770,000. The estimate is derived from the most current cost of similar street rehabilitation project. The total project cost breakdown is itemized below:

<u>ITEM</u>	<u>BUDGET</u>
Construction:	\$ 615,500
Engineering:	\$ 35,000
Inspection:	\$ 35,000
Contingency:	\$ 84,500
Total Construction Cost:	\$ 770,000

The project Plans and Specifications are complete and the Public Works Department is ready to advertise for the construction bids for this project, upon City Council approval. A copy of the project specifications will be on file with the City Clerk.

FISCAL IMPACT

The Bartley Avenue Street Rehabilitation project is fully funded through the UUT Capital Improvement Project Fund.

Report Submitted By: Noe Negrete, Director
Department of Public Works

Date of Report: July 22, 2016

ITEM NO. 13

INFRASTRUCTURE IMPACT

City Council Meeting

July 28, 2016

NEW BUSINESS

Parkette Playground Improvement (Bradwell Parkette, Longworth Parkette and Davenrich Parkette) – Authorization to Advertise for Construction Bids

RECOMMENDATION

That the City Council take the following actions:

1. Approve the Plans and Specifications; and
2. Authorize the City Engineer to advertise for construction bids.

BACKGROUND

The proposed playground improvement project on three (3) parkettes located at 9426 Bradwell Avenue, 10538 Longworth Avenue and 10977 Davenrich Street will replace the existing playground structures, and surfacing that has exceeded its service life, with new playground structures and full rubberized surfacing. The new playground structures and facilities will have the same purpose and capacity of the existing playground structures. Also, the existing lighting on these facilities will be replaced with LED light poles and existing irrigation sprinkler heads affected by the expansion of the pit will be modified.

The estimated construction cost of the Parkette Playground Improvement is \$270,000. The total project cost including construction, engineering and inspection and contingency is \$321,000. The estimate for the project is derived from the most current cost of similar types of construction projects in the area. The total project cost breakdown is itemized below:

ITEM	BUDGET
Construction:	\$ 270,000
Engineering:	\$ 20,000
Inspection:	\$ 16,000
Contingency:	\$ 15,000
Total Construction Cost:	\$ 321,000

The project Plans and Specifications are complete and the Public Works Department is ready to advertise for the construction bids for this project, upon City Council approval. A copy of the Plans and Specifications are available for review at the office of the City Clerk.

Report Submitted By:

Noe Negrete, Director
Department of Public Works

Date of Report: July 21, 2016

ITEM NO. 14

FISCAL IMPACT

The Parkette Playground Improvement is fully funded through the Grant No. 58J5-16-2582 from Los Angeles County Regional Park and Open Space District. In addition, insurance proceeds (approximately \$21,000) from damaged playground equipment completes the project funding.

INFRASTRUCTURE IMPACT

The project will reduce annual maintenance and will comply with ADA accessibility requirements.

Water Well No. 12 Engineering Design Services for Water Treatment System - Award of Contract

RECOMMENDATION

That the City Council take the following actions:

1. Accept the Proposals; and
2. Award a contract to Civiltec Engineering, Inc., Monrovia, California, in the amount of \$229,840.00; and
3. Authorize the Director of Public Works to execute a contract with Civiltec Engineering Inc.; and
4. Appropriate \$230,000.00 from the Utility Users Tax (UUT) Capital Fund to Activity No. 454-397-C366-4400 to fund the cost of the proposed contract.

BACKGROUND

The City Council, at their March 24, 2016 meeting, authorized the Director of Public Works to request proposals Engineering Design Services for a Water Treatment System for Water Well No. 12.

The City received proposals from the following five (5) firms:

1. AKM Consulting Engineers
2. CivilSource, Inc.
3. Civiltec Engineering, Inc.
4. Stetson Engineers, Inc.
5. Waterworks Engineers

The proposals were evaluated based on several criteria, including qualifications of the contractor, proposed staffing levels, key personnel, proposed approach to the project's scope of work, past experience and proposed fee schedule. A summary of the Evaluation Team's scores is attached.

Staff is recommending that the City Council award a contract to Civiltec Engineering, Inc. in the amount of \$229,840.00.

FISCAL IMPACT

The cost of the proposed contract will be funded by the UUT Capital Fund.

Report Submitted By:

Noe Negrete, Director
Department of Public Works

A handwritten signature in blue ink, appearing to be 'NN'.

Date of Report: July 21, 2016

INFRASTRUCTURE IMPACT

With a water treatment system, Water Well No. 12 will provide a high capacity source of water supply for the City's residents and businesses. This new source of water will improve system reliability and efficiency throughout the City's water distribution network. Further, it will reduce the City's cost of purchasing water from outside sources which continue to increase their water rates and charges.

Fm 
Thaddeus McCormack
City Manager

**CITY OF SANTA FE SPRINGS
PROFESSIONAL SERVICES AGREEMENT**

THIS AGREEMENT, made and entered into this **28th** day of **July 2016**, by and between the **City of Santa Fe Springs** (CITY), and **Civiltec Engineering, Inc.** (CONSULTANT), CITY and CONSULTANT (PARTIES) hereby enter into in consideration of the mutual covenants and promises contained herein. The Parties do mutually agree as follows:

1. CONSULTANT will provide the services (SERVICES) proposed in a Proposal from CONSULTANT, dated May 12, 2016, and which Proposal is hereby incorporated by reference and made a part of this Agreement, and CONSULTANT shall organize, supervise, prepare and complete said SERVICES as set forth therein. Said services shall be referred to as "Water Well No. 12 Engineering Design Services for Water Treatment System".

2. It is the intent of the CITY to enter into this Agreement with the CONSULTANT for a not to exceed fee of **\$229,840.00**.

3. CITY shall compensate CONSULTANT for the SERVICES as detailed in the CONSULTANT'S Fee Proposal, and which Fee Proposal is hereby incorporated by reference and made part of this Agreement. Compensation shall become payable on a periodic time schedule as approved and agreed to by CITY and the CONSULTANT.

4. The parties hereto acknowledge and agree that the relationship between CITY and CONSULTANT is one of principal and independent CONSULTANT and no other. CONSULTANT is solely responsible for all labor and expenses associated with the performance of the SERVICES. Nothing contained in the Agreement shall create or be construed as creating a partnership, joint venture, employment relationship, or any other relationship except as set forth between PARTIES. This includes, but is not limited to the application of the Federal Insurance Contribution Act, the Social Security Act, the Federal Unemployment Tax Act, the provision of the Internal Revenue Code, the State Revenue and Taxation Code relating to income tax withholding at the source of income, the Workers' Compensation Insurance Code, 401(k) and other benefit payments and third party liability claims. CONSULTANT specifically acknowledges that CITY is not required to, nor shall, provide Worker's Compensation Benefits Insurance for CONSULTANT. Notwithstanding the above, CONSULTANT hereby specifically waives any claims and/or demands for such benefits.

5. CONSULTANT shall defend, indemnify, hold free and harmless the CITY and its appointed and elected officials, officers, employees and agents from and against any and all damages to property or injuries to or death of any person or persons, including attorney fees and shall defend, indemnify, save and hold harmless CITY and its appointed and elected officials, officers, employees and agents from any and all claims, demands, suits, actions or proceedings of any kind or nature, including but not by way of limitation, all civil claims, worker's' compensation claims, and all other claims resulting from or arising out of the acts, errors or omission of CONSULTANT, whether intentional or negligent, in the performance of this Agreement.

6. CONSULTANT will not be required to follow or establish a regular or daily work schedule. Any advice given to the CONSULTANT regarding the accomplishment of SERVICES shall be considered a suggestion only, not an instruction. The CITY retains the right to inspect, stop, or alter the work of the CONSULTANT to assure its conformity with this Agreement.

7. CONSULTANT shall comply with CITY'S Harassment Policy. CITY prohibits any and all harassment in any form.

8. CONSULTANT is required to obtain the following forms of insurance and provide City with copies therewith:

- a. Worker's Compensation insurance with statutory limits, and employer's liability insurance with limits not less than \$1,000,000 per accident
- b. Commercial general liability insurance or equivalent form, with a combined single limit of not less than \$2,000,000 per occurrence
- c. Business automobile liability insurance, or equivalent form, with a combined single limit of not less than \$1,000,000 per occurrence. Such insurance shall include coverage for owned, hired and non-owned automobiles.
- d. Professional liability (errors and omissions) insurance, with a combined single limit of not less than \$1,000,000 per occurrence.

CONSULTANT shall maintain the required insurances throughout the term of the contract, and shall have insurance agent send Certificate of Insurance to CITY, with CITY named as additional insured. A 30 day notice of cancellation is required.

9. This Agreement may be terminated by either party for any reason at any time by providing written notice of such termination to the other party.

A. LETTER OF OFFER

City of Santa Fe Springs
Department of Public Works
11710 Telegraph Road
Santa Fe Springs, CA 90670

May 12, 2016

Attention: Noe Negrete, Director of Public Works

Subject: Request for Proposal for Water Well No. 12
Engineering Design Services for Water Treatment System

Dear Mr. Negrete:

Civiltec engineering, inc. (Civiltec) is pleased to present our proposal to provide professional engineering services to the City of Santa Fe Springs (City) for the above mentioned project. *Civiltec* has a special interest in this project because of our vast experience with groundwater production well projects and our company's design, construction management and planning efforts performed in Southern California for numerous water agencies and districts.

PRIMARY POINT OF CONTACT

Bed Dawadi
Civiltec Engineering, Inc.
(Federal Tax ID No. 95-4043476)
118 W. Lime Avenue
Monrovia, CA 91016
(p) 626.357.0588 | (f) 626.303.7957
(e) bdawadi@civiltec.com

With this in mind, *Civiltec* offers herein a team of engineers with sound technical and management backgrounds based upon experience in design and construction management of groundwater production wells as well as other types of water infrastructure facilities. *Civiltec* is committed to supporting this assignment with the best technical and personnel resources at its disposal from our Monrovia Office. Sub-consultants selected for this project include Delta Systems Engineering, Inc. (Delta) for electrical and systems controls.

Civiltec has cultivated regional expertise in water resources. Approximately 90% of our work is with public agencies and of that, approximately 85% is related to work directly for water purveyors and municipalities. We work closely with our clients to meet the dynamic demands of the real world and are privileged to cultivate long-term relationships with our clients. *Civiltec* is uniquely qualified to perform the services required for this project because of:

- Our engineering team's expertise in design, cost estimating, and construction management of 10+ groundwater well treatment projects within 10 years. Some of the Treatment Plan Design experience includes VOC and Perchlorate Treatment Plant (California Domestic Water Company), Iron and Manganese Treatment Plant (Desal Water Company), Biological Nitrate Treatment System (Sunny Slope Water Company), Chemical Nitrate Treatment System (San

City of Santa Fe Springs Proposal for Water Well No. 12
Noe Negrete, Director of Public Works
May 12, 2016
Page 2

Gabriel Valley Water Company), Nitrate and Perchlorate Treatment System (City of Alhambra), VOC and NDMA Treatment System (City of Pasadena) and many others

- Our engineering team's expertise in design, cost estimating, and construction management of 10+ groundwater well projects including Longley Well and Camino Real Well Design (City of Arcadia), Well No. 2 (600 gpm) (TVMWD), Well No. 10 (5,000 gpm) and Well No. 13 (3,500 gpm) (CDWC), Well No. 15 (2,500 gpm) (San Gabriel County Water District), Well No. 20 (3,000 gpm) (Yorba Linda Water District), four wells with capacities ranging from 1,700 to 2,800 gpm (City of Pasadena), Rialto Extraction Well and Treatment Equipment Design, Well No. 16 (San Gabriel County Water District), Extraction Well at Camp Pendleton and many others.
- *Civiltec's* diverse knowledge of water facilities design, system reliability issues, facility maintenance, site development, and facilities construction methods. Water system design is our core competency and we are consistently engaged in developing and planning for improvement projects associated with water infrastructure.
- Our team's knowledge of water engineering activities, water system planning, capital improvement program development, water system evaluations, budget analyzes, and project scheduling performed for municipal, district and private water purveyors. Our experience allows us a unique perspective to the actual costs of construction and operations.
- Our long standing, good working relationship with the water agencies and district we work for.

Civiltec Commitment

Civiltec's professionals are energized and committed to providing every client with fresh innovative, consistent, superior engineering, and cost effective solutions on every project. Our teams are always committed to producing plans, specifications, reports, and documents for clients by communicating and troubleshooting early on during design to avoid construction problems or delays in the field. This helps to ensure that sound and intelligent recommendations and solutions are reached and have the best chance for success because they will also be supported by the involvement of the project team as a whole. Knowledge and communication are the foundation for successful problem avoidance and when necessary, sound and decisive problem resolution.

We appreciate the opportunity to submit our proposal and look forward to assisting the City in the successful completion of this project. *Civiltec* prides itself on personal service to our clients and has a reputation for fast response and high quality standards. *Civiltec's* management team is oriented toward QA/QC by a "hands-on" approach to work accomplishment. We are confident that we are the right firm for this project and we are extremely excited and motivated to serve the City. Feel free to contact the undersigned directly with any questions or comments. As a company Principal, C. Shem Hawes has the authority to execute this proposal. By signing this proposal, I attest that all information submitted with this preproposal is true and correct. This proposal shall remain valid for a period of 90 calendar days from the date above. We are in receipt of Addendum No. 1 dated April 26, 2016 and included in Appendix C.

Sincerely,

Civiltec Engineering, Inc.

C. Shem Hawes, PE

Principal, Senior Engineer

B. QUALIFICATIONS OF THE FIRM

FIRM PROFILE

Civiltec was established in 1986 on the principles of innovative thinking and premier quality. *Civiltec* is a "C" Corporation founded in California and registered as a Small Business Enterprise with the U.S. Small Business Administration and a Small Business Concern with the Coalition of Southern California Public Agencies.

With 35+ employees, we maintain 14 registered civil engineers, 3 registered land surveyors, 2 certified floodplain managers, 1 LEED AP, 2 engineers-in-training and a support staff including project managers, designers, CADD technicians, survey crews, and administrative personnel in three office locations: Monrovia, California (headquarters) and Peoria and Prescott, Arizona. *Civiltec's* services includes land surveying; civil, drainage, transportation, water, and wastewater engineering; and construction management. We are not too big; we can and will be there when needed in an efficient and affordable fashion. We are not too small; we will provide you with the depth-of-bench needed to guarantee continuous service and adherence to the project schedule.

FINANCIAL CONDITION

Civiltec has never filed for bankruptcy nor do we have any history of or pending litigation, outstanding claims, planned office closures, or mergers. Our clients can take comfort in the fact that we have a very strong balance sheet.

PREVIOUS PROJECT EXPERIENCE

Civiltec has developed strong working relationships with our clients. Over the past 5 years we have averaged approximately 175 projects per year company-wide. Approximately 90% of our work is with public agencies.

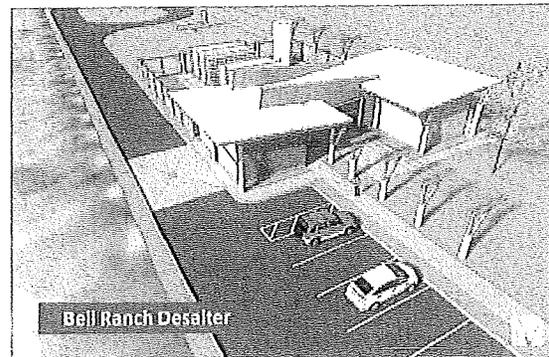

Our success in developing strong relationships with our clients is a result of our emphasis on client service and complete satisfaction. A mutual relationship based on trust and service is

a goal that is set with each and every project we embark upon. We believe that providing quality professional engineering and surveying is our main focus when taking on a project.

Iron and Manganese Treatment Plant, Desal Water Company

Civiltec prepared 30% design plans for this 7.15 mgd Iron/Manganese water treatment plant located near the intersection of Somis and Las Posas Roads, within unincorporated Ventura County, just outside the Camarillo City boundary. The building will be approximately 7,400 square feet with a Chemical dosing systems, reaction vessels, filtration vessels, reverse osmosis unit mounted on skids, blending pipe islands, a permeate pump station and a small amount of office space. There will also be an infiltration/detention basin at the western end of the property, approximately six parking spaces near the entry to the site, and an area reserved west of the proposed building for future expansion.

Civiltec reviewed the water quality information of basin to determine the necessary treatment components and developed treatment

alternatives. A complete general/physical analysis of the groundwater sampled in the last two years was completed to formulate the treatment needed for the impaired groundwater. Various treatment alternatives were evaluated and ranked using appropriately weighted factors and all key criteria such as Capital and O&M Costs, reliability, process complexity, and ease of operation. The most cost effective solution was selected for further study and development.

Civiltec also outlined the qualifications to solicit vendor information and quotations for the primary elements of the filtration and reverse osmosis system. *Civiltec* performed an analysis and design of the entire water and waste brine system from the groundwater aquifer to the potable water discharge point and waste brine discharge point. The process and treatment system design will incorporate the review and competitive selection of a filtration and reverse osmosis equipment system vendor. Once a vendor is selected the treatment process and design will integrate the input from the selected vendor to determine the final configuration of the system. In this effort each reverse osmosis system will be evaluated for suitability, economy and functionality in full scale implementation of the system. The treatment system will be configured to optimize space utilization through effective placement of the individual unit processes. In this manner the foot print of the entire treatment process will be minimized and integrated into the full site planning effort. Also included in *Civiltec's* scope of work was the development of preliminary alignments and concepts for routing transmission pipelines from the wells to the treatment system and conveyance pipeline from treatment plant to the distribution main.

Team Members: Shem Hawes (Principal-in Charge), Bed Dawadi (Project Manager), David Byrum (QA/QC Manager), Sean Cho (Project Engineer), Jorge Martinez and Jenny Tsan (Designer/Drafter), Sara Canche (Planning Technician), and Dee Nichols (DeltaSE's Project Manager for Electrical and Control)

Nitrate Treatment System at Plant B6, San Gabriel Valley Water Company
Plant B6, located in Baldwin Park, pulls groundwater from four offsite wells (B25A,

B25B, B26A, B26B). Unfortunately, due to the rising concentration of nitrate in these wells, SGVWC was spending increasing amounts of capital on maintenance while experiencing a reduction in flow capacity.

Nitrate Removal System at Plant B6

- The SGVWC project involved a re-generable ion exchange nitrate treatment system. For efficiency, only a portion of the water is actually treated. The remaining water bypasses treatment and is ultimately blended with the treated water.

- Design of the system included three treatment vessels, softening equipment, piping trees, control valves, control panels, static mixer, brine solution tanks, and a waste brine tank.

VOC and Perchlorate Treatment System, California Domestic Water Company

Civiltec has an on-call engineering contract with California Water Company since 1990s to provide engineering services for infrastructure improvements, water treatment plant design, retrofit and miscellaneous engineering services.

Civiltec has been retained by CDWC to design an air stripper to remove VOCs from existing ground water wells. The plant capacity is approximately 20,000 gpm and is located at the City of El Monte. Mr. Dawadi served as Project Manager and Project Engineer of the Project.

"*Civiltec* is our go-to engineering firm. They are a professional, customer service oriented organization."

~ Jim Byerrum, President
California Domestic Water Company

Civiltec is also retained by CDWC to design perchlorate removal system for Well 10. Mr. Dawadi served as Project Manager and Project Engineer of the Project and was integral in determining system layout configurations, piping arrangements and leading the design team to complete design.

Client Reference: Lynda Noriega, General Manager (562) 464-0840 | LNoriega@caldomestic.com

Team Members: Bed Dawadi (Project Manager), Shem Hawes (Principal-in-Charge), David Byrum (QA/QC Manager), Sean Cho (Project Engineer), Nick Brethorst (Staff Engineer), Jorge Martinez (Designer), and Dee Nichols (DeltaSE's Project Manager for Electrical and Control)

Nitrate and Perchlorate Treatment Projects, City of La Verne

Civiltec is under annual contract with the City of La Verne to provide engineering services for infrastructure projects including water system improvements, sewer system improvements, street reconstruction projects and miscellaneous engineering. Mr. Byrum has been the City Engineer and/or City Utility Engineer for the City since 1984.

Civiltec also designed an air stripper project to remove VOCs in the early 1990s, and miles of pipelines. *Civiltec* has designed reservoirs, pump stations, new wells, rehabilitation of existing wells, a nitrate and perchlorate reduction plant, numerous street and alley reconstruction projects, a 1.5-mile new roadway access into the hillside including all infrastructure, bridge widening projects, bike and horse trails, miles of pipelines, and building renovations.

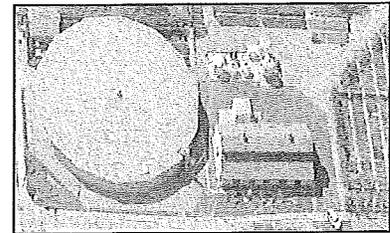

Client Reference: Dan Keesey, Director of Public Works, (909) 596-8741 | dkeesey@ci.laverne.ca.us

Team Members: David Byrum (Project Manager) and Jorge Martinez (Designer)

Nitrate and VOC Treatment Plant, City of Alhambra

Civiltec implemented a \$15 million project involving the construction of a new nitrate and VOCs treatment plant for the City of Alhambra. The plant has the capacity to treat groundwater produced from Well Nos. 7, 8, 11, and 12 along with the production from a future Well No. 17

proposed to be constructed at a site located south of the Well No. 7 site. Both treatment systems will have capacity to treat the combined total production from each of these facilities, projected to be approximately 7,000 gpm.

Reference: Dennis Ahlen, Current General Manager (626) 570-3274

Team Members: David Byrum (Principal-in-Charge), Jorge Martinez (Designer), and Sara Canche (Planning Technician)

Monk Hill Treatment System (MHTS), City of Pasadena Water & Power

Civiltec completed the design and administered the construction of the MHTS perchlorate and VOC treatment system located in the City of Pasadena near the Jet Propulsion Laboratory. The project consisted of preliminary equipment and resin procurement for select perchlorate removal and VOC media. Procurement of the equipment involved developing performance based specifications to foster competitive bidding amongst the equipment manufacturers.

Civiltec also completed design of the OU-1 perchlorate and VOC treatment system located at the Jet Propulsion Laboratory campus. This project included biological fluidized bed reactors for the removal of perchlorate and a LGAC system for removal of VOC as well as three

extraction wells, three injection wells, and related connecting piping systems.

Team Members: Shem Hawes (Project Manager), David Byrum (Principal-in-Charge), Bed Dawadi (Project Engineer), Jenny Tsan (Designer), and Sara Canche (Planning Technician)

Strength and Stability of the Firm

Civiltec has immediate staff availability to begin a new project and continue through completion. We are committed to providing our best and most appropriate technical resources to the City throughout the duration of this contract.

To ensure project resources are available we conduct weekly project team meetings to review project status and resource utilization.

Civiltec is organized in a way that we can form anywhere from a two-person team to a twenty-person team to accomplish small and large

WORKLOAD AVAILABILITY

Key/Personnel	Availability

Delta System	30%

projects. Sub-consultants are members of the team when an outside expertise is required to complete the project goals. There is tremendous flexibility in our system of team organization to allow for primary team members and backups. In this way, we can handle multiple assignments at the same time and change rapidly to handle an expeditious schedule.

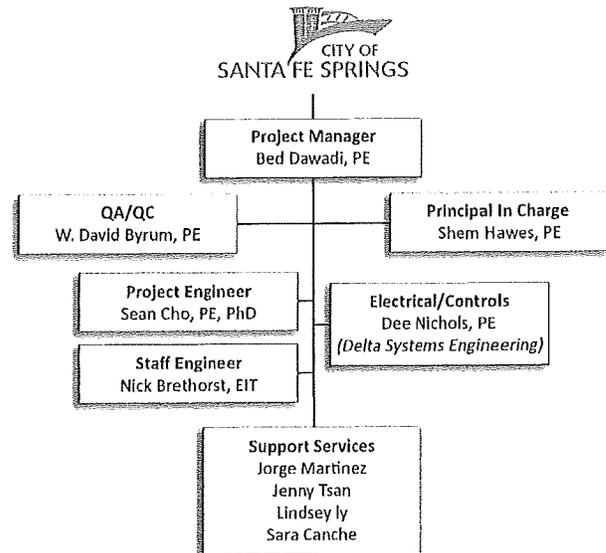

C. PROPOSED STAFFING AND PROJECT ORGANIZATION

The personnel in the Monrovia office are experienced public works engineers, construction managers and qualified observation staff with 150+ years of combined experience.

All work assigned to us, by the City, will be managed and accomplished in our Monrovia, California office. *Civiltec* prides itself on personal service and has a reputation for fast response and high quality standards.

We are committed to building the right team for each project, tailored to the specific needs of our clients. *Civiltec* is committed to providing our clients with innovative, cost-effective solutions on every project. We strive to achieve a balance between form and function, budgets and best solutions, and passion and practicality. Our reputation and the quality of our work are paramount to us. We look forward to developing a mutually beneficial working relationship with the City. We are confident that we are the right firm for this project, which our proposal will demonstrate, and we are extremely excited and motivated to serve the City.

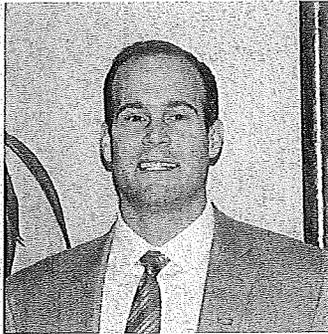

An organizational chart of our proposed team is shown below followed by key team member's qualifications and experience. Key personnel shown below will be available to the extent proposed for the duration of this contract. No

person designated as key personnel will be removed or replaced without prior written concurrence from the City.

 Construction Management

Mr. Hawes will be the company representative in all contractual matters. Mr. Hawes has 10+ years of water and wastewater experience. Wastewater experience has included the planning, design, and construction management of wastewater treatment facilities and performing analysis on sewer collection facilities and designing sewer pump stations. In addition, he was involved in modeling and designing a water distribution and sewage collection systems. He was intimately involved with development of mass balance models for wastewater treatment processes which integrated recycled and utility water return and solids handling into the overall loading of the plant. Unique wastewater treatment plant processes could be programmed into this model to simulate mass loading through the plant and determine the cause and effect to the plant as a whole. In addition, Mr. Hawes developed hydraulic modeling systems to simulate hydraulic conditions through plant operations.

Over his tenure at *Civiltec*, Mr. Hawes has been integral in developing relationships with clientele and interacting at multiple levels with business partners and owners to develop solutions for water, wastewater, and public works projects. He has been the responsible engineer for hundreds of unique planning, design and analytical projects while acting in the role of Project Manager or Senior Engineer.

Select Project Experience

Project Manager – Monkhill Treatment Plant

Mr. Hawes has been responsible for the design of the Monkhill Treatment Plant in the City of Pasadena a 7,000 gpm combined VOC with treatment via liquid phase granular activated carbon and perchlorate treatment plant. Design includes the development of process and instrumentation diagrams, site layouts, yard piping drawings, mechanical drawings, and the chloramination system.

Principal-in Charge – SGVWC Plant B6 Nitrate Removal

Mr. Hawes was the Project Manager for the San Gabriel Water Company Plant B6 Nitrate Removal Facility. The project consisted of design for a regenerable ion exchange process with the capability to treat upwards of 7,800 GPM blended flow. The treatment process consists of a blending station, ion exchange vessels, brine solution maker, water softening and waste brine storage and discharge facilities.

Principal-in Charge – California Domestic Water Company VOC Treatment Plant

Mr. Hawes is the Project Manager in the pre-design and design of the 5,000 GPM VOC Treatment Plant for California Domestic Water Company. The project includes design of a new Air Stripping System, air phase GAC system, disinfection with a new sodium hypochlorite system, pH adjustment with sulfuric acid, yard piping, valves and controls system. The project also includes designing of pumping systems for the influent and finish water with valves and piping.

Principal-in Charge – SGVWC Dioxane and NDMA Removal Treatment Plant

Mr. Hawes is the Project Manager in the pre-design and design of the 5,000 gpm 1,4-Dioxane and NDMA Removal Treatment Plant for San Gabriel Valley Water Company. The project includes design of advanced oxidation with UV and peroxide system, yard piping, valves and controls system. The project also includes designing of pumping system for hydrogen peroxide with valves and piping.

Principal-In Charge – Rialto Airport Perchlorate & VOC Removal Treatment Plant

Mr. Hawes is the Project Manager in the pre-design, design and review of the 2,040 gpm Perchlorate and VOC Removal Treatment Plant for Source Area Operable Unit at Rialto Airport. The project includes design of three IX vessels for new treatment system, one IX vessel for the existing IX system, four LGAC vessels, two sets of Bag/Cartridge filters (one for the existing system and another for the new system), UV disinfection system, backwash system, yard piping, valves and controls system. New calcium hypochlorite disinfection system was also the part of the project.

Project Manager – City of El Monte Operable Unit Treatment Facility

Mr. Hawes was the Project Manager for the El Monte Operable Unit treatment facility. Project includes the design of well head equipment for three well located in the City of Rosemead. Pipeline drawings have been prepared for conveyance of the three wells to a location approximately 1.5 miles away. Treatment facilities have been designed to treat upwards of 600 gpm flow for VOC contamination.

Project Manager – El Monte Well 2A and 3 VOC Treatment and Blending Project

Mr. Hawes was the Project Manager in the design of equipping existing Well No. 3, providing VOC treatment for Well No. 3 and blending the effluent from Well No. 3 with the effluent from Well No. 2A. The project included installing tanks and surrounding wall in conspicuous portion of the existing city owned parking lot; and providing stucco and lattice on block wall to match existing surrounding structures; located blending station at Well No. 2 and connect with the system. Also obtained funding from the state for the project and met state required deadlines for design and construction.

Project Manager – Yorba Linda Water District Well No. 20

Mr. Hawes is project manager for design and equipping of the Yorba Linda Water District Well No. 20 production well. Production well capacity is designed to be nearly 3,000 GPM and will be equipped with a 400 HP pump and ancillary equipment including automatic pump-to-waste features, a pump control valve, new on-site sodium hypochlorite disinfection facilities. Improvements also include improvement with the existing Well No. 11 electrical system and PLC upgrades.

 Construction Management

Mr. Dawadi will be assigned as Project Manager and primary point of contact with the City. He will be responsible for the daily supervision of the project team, management of the budget and schedules, and attendance at all project related meetings. Mr. Dawadi has 9+ years of water and wastewater engineering experience. His responsibilities includes the planning, design, and construction management of public works projects.

Mr. Dawadi has been involved in numerous well design, treatment plant design and master planning efforts, the most recent being the Desal Water Company Iron/Manganese and Reverse Osmosis Treatment Plant design, Tidewater/Camp Pendleton Extraction well design, Well No 2 for Three Valley Municipal Water District and 1-4 Dioxane treatment system for San Gabeil Valley Water Company. These studies included comprehensive analyses of water quality, supply, storage, booster pumping, treatment and distribution systems and recommendations for improvements to those systems to satisfy future requirements. A cost estimate and delineation of extent was developed for each improvement, and a flexible schedule for implementation was proposed based on perceived urgency, scheduled development, the regulatory environment and other factors. Care was taken to coordinate with and complement existing planning documents governing land use, urban planning, urban water management, groundwater management and water conservation.

Select Project Experience

Project Manager – Desal Water Company

Mr. Dawadi is the Project Manager in pre-design and design of the 7.15 mgd iron, manganese and reverse osmosis treatment plant for Desal Water Company. The project includes review of water quality data and formulate the treatment system to remove iron, manganese and salt from impaired ground water. Treatment alternatives were evaluated, selected and designed.

Project Manager – California Domestic Water Company VOC Treatment Plant

Mr. Dawadi is the Project Manager in the pre-design and design of the 5,000 gpm VOC Treatment Plant for California Domestic Water Company. The project includes design of a new Air Stripping system, GAC system, disinfection with sodium hypochlorite system, pH adjustment with sulfuric acid, yard piping, valves and controls system. The project also includes designing of pumping system for influent and finish water with valves and piping.

Project Manager – Nitrate Treatment System for Sunny Slope Water Company

Mr. Dawadi is the Project Manager in the design of Nitrate Treatment System for Sunny Slope Water Company. Civiltec collaborate with the Vendor Microvi to integrate a state of the art biological treatment system for removal of Nitrate from the two of SSWC's drinking water production wells. The project includes design of structural and civil components along with electrical service upgrade and control integration for new water treatment system.

Project Manager – SGVWC 1,4-Dioxane & NDMA Removal Treatment Plant

Mr. Dawadi is the Project Manager in the pre-design and design of the 5,000 gpm 1,4-Dioxane and NDMA Removal Treatment Plant for San Gabriel County Water Company. The project includes design of the advanced oxidation with UV and peroxide system, yard piping, valves and controls system. The project also includes the design of pumping system for hydrogen peroxide with valves and piping.

Project Manager – SGVWC Nitrate Removal Treatment Plant

Mr. Dawadi is the Project Manager in the pre-design and design of the 7,800 gpm Nitrate Removal Treatment Plant for San Gabriel Valley Water Company. The project includes design of three IX vessels, softening system, brine preparation system, spent brine collection system, rinse water recovery system, LGAC system, backwash system, yard piping, valves and controls system. The project also includes design of pumping system for spent brine, brine regeneration and rinse water with valves and piping. Compressor and Salt blower were also integrated.

Project Manager – Rialto Airport Perchlorate & VOC Removal Treatment Plant

Mr. Dawadi was the Project Manager in the pre-design, design and review of the 2,040 gpm Perchlorate and VOC Removal Treatment Plant for Source Area Operable Unit at the Rialto Airport. The project included design of three IX vessels for new treatment system, one IX vessel for existing IX system, four LGAC vessels, two sets of Bag/Cartridge filters (one for existing system and another for new system), UV disinfection system, backwash system, yard piping, valves and controls system. Project also included new calcium hypochlorite disinfection system.

Lead Engineer – Jerry Eaves Park Extraction Well

Mr. Dawadi was the Project Lead Engineer in the pre-design, design and review of the 2,040 gpm extraction well for Source Area Operable Unit at Jerry Eaves Park in Rialto. The project included the design of a new 2,040 gpm extraction well, approximately a mile of conveyance pipeline, and preparation of base maps identifying existing utilities in the conveyance lines.

Project Engineer – Valley County Water District - Lante Plant

Mr. Dawadi was the project engineer in the pre-design and design of water blending system at Lante Plant for Valley County Water District. Design included installation of bypass system, blending station, and retrofitting of UV wet well.

Project Engineer – Tidewater/NASA/PWP Treatment Plant

Mr. Dawadi prepared a pre-design report of new package treatment plant for Tidewater/NASA/PWP evaluating existing sources of waste from MHTS system. Mr. Dawadi also prepared the pre-design reports for 2,000 gpm new extraction wells in MHTS system for PWP/NASA and another 2,000 gpm new extraction well for Lincoln Avenue Water Company.

Mr. Byrum will be responsible for a timely response and quality completion of this project. As a company Principal, Mr. Byrum has authority to commit all resources necessary to meet all requests.

Mr. Byrum is Owner, President, and Principal Engineer of *Civiltec*. Mr. Byrum has 35+ years of experience in the water industry in Southern California and has designed and managed construction of over 50 groundwater well projects since 1984. He is an expert in design of water distribution and transmission pipelines, water treatment plants, booster pumping stations, steel and concrete reservoirs, groundwater wells, specialty valving stations, wastewater lift stations, flow equalization stations, wastewater treatment plants, storm drains, and street improvement projects. Mr. Byrum also prepares regulatory agency compliance reports and technical studies to ensure water purveyors remain in compliance with current regulations. Mr. Byrum serves as an expert witness and has been involved in cases centered on water industry issues, including the Chromium 6 PG&E case for six years.

Select Project Experience

Principal Engineer –Groundwater Well Projects

Mr. Byrum recently completed wells for the City of Upland; San Bernardino Valley Municipal Water District (SBVMWD); San Gabriel County Water District; City of Monrovia; California Domestic Water Company; City of Arcadia; La Habra Heights County Water District; Crescenta Valley Water District and the City of La Verne. The two SBVMWD facilities were each 1,000 HP, 5,000 gpm, wells including site piping, vaults, buildings and variable frequency drive units. Most well facilities included buildings, chlorination, piping, and electrical improvements.

Principal Engineer –Water Treatment Plant Projects

Mr. Byrum has been responsible for the design and construction management of over 10 treatment plants in his career including 2,000 gpm air stripper and 2,500 gpm perchlorate and nitrate ion exchange treatment plant for the City of La Verne; a 7,000 gpm VOC and nitrate treatment plant for the City of Alhambra; a 4,000 gpm VOC treatment plant for the City of Monterey Park; a 4,000 gpm air stripper for the City of Monrovia and a 500 gpm biological and carbon plant for JPL/NASA to remove VOCs and perchlorate as well as a 7,000 gpm perchlorate and VOC plant. One of the City of La Verne's projects involved headering four wells into a perchlorate IX treatment system and then into a nitrate IX system. All treatment plants involved DPH permitting.

The City of Alhambra Plant involved preparation of a 97-005 assessment documents, bidding phase services and full construction management.

Principal Engineer – City of Azusa System Integration

Mr. Byrum was the Principal Engineer for this project and was responsible for the design and construction management of the integration of the City of Azusa Water System with the Azusa Valley Water Company System as part of merging of the two systems. The integration involved the design and installation of several pressure regulating and flow regulating stations to support the combination of pressure zones. Several stations were installed to provide supply redundancy and pressure control. The PRV stations involved 2 to 3 various sized valves in vaults with SCADA provisions, traffic ratings and ventilation.

Principal Engineer – California Domestic Water Company Transmission Pipeline Project

Mr. Byrum was the Principal Engineer for this project and was responsible for the design and construction management for approximately 35,000 LF of 30, 36, 48 and 54-inch pipelines for CDWC. These projects were phased over several years and included right-of-way engineering, environmental clearances, permitting with several jurisdiction agencies, aerial and topographic surveying, geotechnical investigations, railroad and channel crossings, plan and profile drawings, specifications and bidding documents, bidding phase services and full construction management.

Principal Engineer – Recent Reservoir Projects

Mr. Byrum has been responsible for the design and construction management of over 50 steel and concrete reservoir projects in his career. The most recent reservoirs designed and constructed have been a 300,000-gallon steel reservoir for Golden State Water Company; a 0.5 and a 1.6 million gallon (mg) steel reservoir for Los Angeles County Water Works District No. 29; a 3.0 mg concrete reservoir for the City of La Verne; a 5.0 mg steel reservoir for the City of La Verne; a 5.0 mg steel reservoir for Suburban Water Systems; a 10 mg steel reservoir and a 15 mg steel reservoir for the City of Brea. Mr. Byrum has also been involved in over ten reservoir rehabilitation projects in the last five years. Two rehabilitation projects have been for the City of La Verne; three for the Golden State Water Company; one for the California American Water Company; one for the City of Brea and two for the City of Alhambra, among others.

Principal Engineer – Recent Pump Station Projects

Mr. Byrum has been responsible for the design and construction management of over 100 pump stations in his career including two 9 cfs pump station for the City of La Verne; an 18 cfs booster station for San Gabriel County Water District; an 8 cfs booster station for TVMWD and a 50 cfs pump station for SBVMWD. One of the City of La Verne's projects involved boosting an import source of low nitrate water to be blended with high nitrate groundwater. The State of California Department of Health Services was involved in approval of an in-line static mixer (the first in Los Angeles County) and pump combination methods to achieve an acceptable nitrate blend rates.

Dr. Cho is an expert in environmental engineering, water chemistry, water quality monitoring, research and evaluation of water quality technology, and advanced engineering education. He has 10+ year of experience focused on water and wastewater projects. His responsibilities have included planning, designing and construction management of subdivisions, land development projects, water tanks, gas stations, and fire stations. He has also been involved in the development of plans, specifications, and cost estimation for various public works projects. Dr. Cho was employed by a water company where he provided advise on water quality issues, coordinating work tasks for employees, visiting sites, project planning, and report writing.

Dr. Cho was a research assistant at Colorado State University and Brigham Young University for academic research related to water security such as water quality monitoring system, appropriate methods and equipment for water quality analysis, and water distribution modeling. He was also responsible for sample collection, laboratory testing of wastewater samples for BOD, TSS, NH₃ and Coliforms, and designing wastewater plants including all modeling.

Select Project Experience

Project Engineer - Nitrate Treatment System - Iron/Manganese/RO Treatment System, Desal Water Company

Project Engineer in pre-design and design of the 7.15 mgd iron, manganese and reverse osmosis treatment plant for Desal Water Company. The project includes review of water quality data and formulate the treatment system to remove iron, manganese and salt from impaired ground water. Treatment alternatives were evaluated, selected and designed.

Project Engineer - VOC Treatment Plant, California Domestic Water Company

Project Engineer in the pre-design and design of the 5,000 gpm VOC Treatment Plant for California Domestic Water Company. The project includes design of a new Air Stripping system, GAC system, disinfection with sodium hypochlorite system, pH adjustment with sulfuric acid, yard piping, valves and controls system. The project also includes designing of pumping system for influent and finish water with valves and piping.

Additional Engineering Team Members

Additional staff available for this contract include Nicholas Brethorst, EIT (Staff Engineer), Jorge Martinez (Designer), Jenny Tsan (CAD Technician), Sara Canché (Planning Technician), and Lindsey Ly (Administrative Assistant). Our project engineers and designers average 15+ years of experience with AutoCAD and Civil3D. *Civiltec* has the ability to produce color and non-color exhibits, draft plots of preliminary plans for review and final Mylar plots from any of our three HP 1050C plotters. Our administrative staff averages 16+ years of experience producing reports, specifications and graphics utilizing the latest version of Microsoft Office and Adobe Creative Cloud, including adding links to report and specification text from Excel.

D. SUB-CONSULTANTS

Civiltec routinely works with sub-consultants to supplement our work. We select the appropriate sub-consultants based on our project understanding, their qualifications/experience and our history working with them. Below are paragraph resumes of key personnel's pertinent experience, area of expertise and proposed role on this project.

Civiltec proposes to assign the electrical engineering design including power distribution, valve controls, and power service to **Delta Systems Engineering, Inc. (DeltaSE)** of Irvine, CA. DeltaSE is a Small Business Enterprise (SBE). DeltaSE is an electrical engineering and integration firm, with extensive experience providing design, construction services, and programming for industrial facility electrical and control systems. DeltaSE has a specialized expertise in all project phases is part of what makes them truly the right solution, enhancing their quality control and allowing them to supply turn-key services for all client's projects. DeltaSE's customers include industrial and private utility companies; contractors; civil engineering firms; and municipal, state, and

federal government clients. DeltaSE has 35 employees in 4 office locations. References include:

- Brian J. Lightbody, Electrical/Electronics Supervisor, (760) 233-3209, San Diego County Water Authority
- Jack Holt, PE, Principal Engineer, (760) 337-3883, The Holt Group

**Delbert (Dee) Nichols, III, EIT (DeltaSE),
Electrical and Controls Lead**
*Education: B.S., Electrical Engineering
Technology, Northern Arizona University*
Registration: Engineer-in-Training

Mr. Nichols has 15+ years of experience with electrical and controls system design. He brings vast project experience to our team, ranging from development of initial conceptual and/or detailed designs to installation, troubleshooting energy studies, and startup of systems. He has experience in generating P&ID's, ISA logic diagrams, loop diagrams, Schematic/Wiring diagrams, one and three-line diagrams, control cabinet layouts, systems communications diagrams, and cable and conduit schedules for projects ranging from stand-alone packaging systems to water treatment and production facilities. Relevant experience as a team member with *Civiltec* includes:

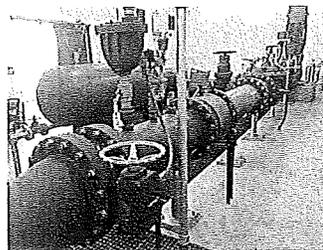

- Perchlorate and VOC Treatment Plant - California Domestic Water Company.
- Iron/Manganese/RO System Treatment Plant - Desal Water Company.
- City of Monterey Park Wells No's 5 & 6 Treatment System.
- Baldwin Park Pumping Plant Wellhead Treatment System.
- City of Escondido HARRF Influent Pump Station and Headworks Facility.
- City of Blythe Water Production Facility, Controls System.
- Numerous Booster Pump Stations and Water Wells - Santa Clarita Water Company.

E. WORK APPROACH

PROJECT UNDERSTANDING/APPROACH

The Well No. 12 improvement project will consist of the development of plans and specifications for a new iron, hydrogen sulfide, and color removal treatment facility. Iron treatment through filtration is proposed to ensure that water quality from the well meets DDW requirements for drinking water and improves the aesthetic look. The well was drilled to replace the City's Well No. 2 and is equipped with a new Peerless Model 14MD vertical turbine pump having 2,000 gpm capacity. The well pump has 300 HP motor, 18 pulse VFD, actuated pump to waste valve system, sand separator and Cla-Val control valves. Disinfection of the well water is accomplished with a bulk sodium hypochlorite chemical feed system consisting of a 2 gallon per hour, duplex, skid mounted packaged pumping system by Prominent, 500-gallon bulk storage tank, and chlorine residual analyzer/controller. The well system is also equipped with all systems necessary for disinfecting using chloramines, including, aqua-ammonia pumping system, storage tank, scrubber, and analyzer. The well is connected to the City's SCADA system and the City's spread spectrum radio links remotely to monitor the site.

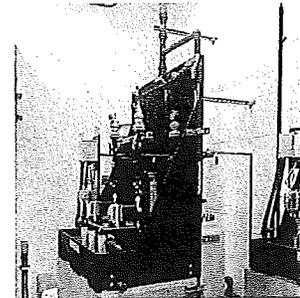

The well has drainage system and for the conditions present in the new system configuration will experience additional head loss as water from the well is diverted from its current point of discharge into the distribution system and will now be diverted to the new treatment system. With new iron/hydrogen sulfide filter, an additional 90-feet of head may be experienced by the well thus resulting in an approximate capacity of 1,600 to 1,800 gpm, assuming water levels in the well are consistent with

Well 12 Pump, Piping and Valves

recent test results. A booster pump can be used to discharge the treated water into the distribution system if needed to maintain design flow.

Water production will be conveyed toward the treatment plant. Since pump to waste operations currently employ the use of a motorized electric actuator to direct water to pump to waste and a Cla-Val valve to distribution system, a new set of pipelines will be configured to intercept these lines outside the building before the distribution system. This may require extending the length of above grade pipe and moving the valves to accommodate this operation. Ultimately *Civiltec* proposes to make this change in piping as efficient as possible to enable continued access to the pump site, chemical dosing facilities, the new treatment plant, and the existing pump to waste vault.

Sodium Hypochlorite and Ammonia Dosing System

Piping will extend from this point to a connection with the proposed treatment facility. Considering that there are numerous vendors with expertise in delivering iron and manganese removal systems we will prepare a design with general parameters for selecting and procuring this equipment. Our approach includes pilot testing of the treatment process to verify the efficiency of the proposed media and pre-purchase of the treatment equipment through a qualitative and quantitative selection process. With the understanding that there are various ways to implement a treatment solution for removal of iron and color we have conceptualized a number of configurations presented herein that utilize the Filtronics Electromedia I filtration system. The reactors are placed upstream of the filter to condition the water matrix for oxidation for ultimate filtration by the filter. These reactors are presented as the water matrix is laden with hydrogen sulfide.

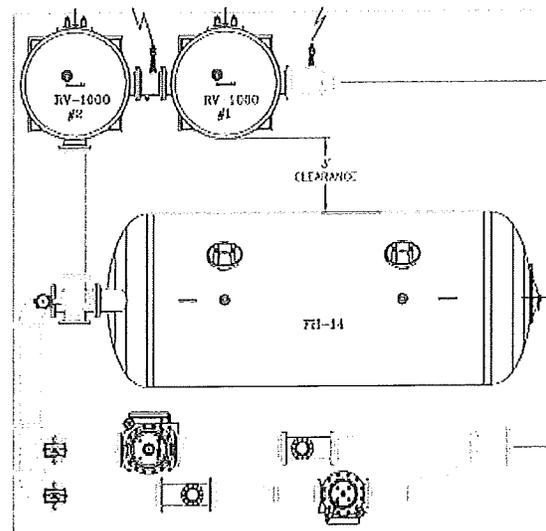

Other vendors will be considered in this selection process to ensure that the best value solution is delivered to the City.

The removal of iron and manganese from potable water supplies is affected by various chemical and physical characteristics of the water. These characteristics are interrelated and an accurate and complete water analysis is essential to identify potential problems. Some of the factors that affect the iron and manganese removal include the following.

- Time
- pH
- Temperature
- Total Organic Carbon (TOC)
- Dissolved Oxygen
- Ammonia
- Carbon Dioxide
- Langelier Index

The removal of hydrogen sulfide is probably the most obnoxious and troublesome compound to deal with in a potable water supply. It is almost an impossible task to produce a palatable water that is free of taste and odor at all times when the hydrogen sulfide is present in significant concentrations in the raw water. A complete removal of hydrogen sulfide can best be accomplished by oxidation by chlorine; conversion of resulting colloidal sulfur and polysulfides by metabisulfite or sulfur dioxide to thiosulfates, and then converting to sulfates by re-chlorination. The series of reaction vessels take advantage of this mechanism by ensuring breakpoint chlorination. The reaction is begun in the first reaction vessel; sulfite is added where the thiosulfate is then formed. The thiosulfate oxidizes very rapidly producing a sulfate and a sulfite. Thus another sulfite is available to continue the conversion of any sulfur or polysulfides.

Chemical addition of sodium hypochlorite will be introduced to oxidize the iron and any manganese present in the water. A sodium

Single Vessel FE/MN Treatment System

bisulfite addition is also considered herein to remove hydrogen sulfide present in the water matrix. Dechlorination would be needed since the sulfide is present in the raw water. Considering the chemical concentration of only 0.8 mg/L of iron present in the water matrix a dosing of 0.51 mg/L of chlorine will be required for its oxidation. Reviewing the water quality analysis, the presence of organic material is minimal in the water matrix as indicated by the TOC concentration results.

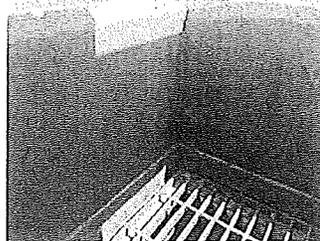

Iron is present in the water matrix manganese is not; however, we expect to see manganese in water as the nearby wells have shown manganese presence. Also, it was indicated that hydrogen sulfide is present in the water in significant amount and it is expected that a dosing of 4 to 5 mg/L of chlorine is required to oxidize sulfide of 0.5 mg/L concentration. An additional 0.5 mg/L would be dosed to maintain chlorine residue. Therefore, the oxidation demand for sodium hypochlorite is anticipated to be significant while leaving an appropriate residual in the treated water flow. In light of this it is expected that the existing sodium hypochlorite dosing system is not sufficient size and capacity to perform iron and manganese oxidation as sulfides are present in the water matrix.

Our effort has considered the inclusion of an optional sodium hypochlorite storage and metering system if it is determined that the existing system, which consists of a 200-gallon tank and two Prominent peristaltic metering pumps, are found to be deficient.

Our design considers two options for treatment of full well production by use of two parallel vessels with or without bypass. The single filtration vessels option minimizes the system footprint as well as capital cost however minimized the operation flexibility and interruption of the flow during backwashing. On the other hand, the dual vessel configuration allows for operational flexibility and eliminates downtime during backwash. The net average result is that when the well is operational it will operate 2 to 3 percent more when the dual vessel configuration is implemented. Typical downtime caused by backwash operation would essentially be eliminated and if a vessel were out of service the other could be operated.

Alternative 1 – Treatment with bypass Blend

The option to internally blend water was considered in conceptualizing our approach to the design. Provided this meets the needs of the City, it may be

*Pump to Waste Discharge Sump –
Stained due to Iron and Color*

an attractive solution to achieve the ultimate objective of treatment. The filtration system has a capacity to treat 2,000 gpm of water when treating all of the anticipated flow. If a target concentration of 80 percent of the secondary MCL were achieved (240 ppb Iron Concentration) thus resulting in 25 percent of the water to be bypassed, a smaller treatment footprint would be realized as well as savings associated with equipment cost. In this scenario approximately 1,500 gpm of water would be treated resulting in a smaller treatment vessel. This will also result in a smaller foot print for

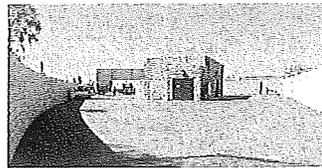

the backwash recovery tank. Ostensibly the backwash rate could be reduced to 1,500 gpm and the backwash tank could be sized at approximately 20,000 gallons (15-foot diameter by 16 feet high). This configuration may also allow for the elimination of a dedicated backwash supply pump. The supply from the distribution system may be of adequate capacity to achieve this lower flow rate. We will include in the design the necessary valves and fitting to accomplish the bypass operations along with the needed support for permit approval.

Alternative 2 – Treatment without bypass Blend

This option involves use of all components specified in Alternative 1 without bypass and blend. In this alternative, we expect two (2) 7-foot to 9-foot reaction vessels for the reaction time attenuation followed by two (2) filter vessels. The foot print of the vessels would be slightly larger than alternative 1 and backwash flow would be approximately 2,000 gpm. This option will require that the backwash recovery tank be approximately 16-foot diameter by 20-foot high with storage capacity of approximately 27,000 gallons.

Backwash recovery and production is considered in our efforts and will be sized to accommodate the backwash water generated during normal operations. The backwash system depending on the ultimate option selection will include a backwash supply pump or flow control valve of adequate capacity to fluidize the bed and achieve backwash. Backwash water will be conveyed to a new backwash recovery tank of sufficient size to accommodate backwash and any rinse water needed. We will specify the configuration of the tank and analyze the options presented by the equipment vendors to include a means to decant the water to recover over 99% of the utility waters generated during filter backwash. The solids settled in the tank will be collected and conveyed via gravity to the nearest sewer system. We envision that an industrial discharge permit will be obtained from the LA County San District and a sewer line, sample box and connection will be made to

the existing sewer located along Borate Street. A recovery pump having approximately 100 gpm capacity will be included in the equipment vendor package for return of clarified water to the filtration system.

Well No. 12 Site & Well Enclosure

In summary, the improvements proposed for the facility will incorporate the design of basic site civil improvements at the well site, piping configurations, chemical dosing equipment as needed, backwash supply, backwash storage, backwash recovery pumps, a sewer connection, and treatment system improvements at the well site. The existing property will be improved with a new steel storage tank, reaction and treatment vessels, booster pump station, and Well No. 12. We anticipate that the manganese will be present in the water and our effort will include design of the treatment system for the removal of manganese. A pilot study will be conducted before selection of the treatment system. A single pass media filtration system will be considered in the design effort to ensure implementation of an appropriate removal method for ultimate drinking water purposes. This equipment shall be incorporated into the overall design of the site and process coupled with the appropriate chemical dosing for iron/manganese removal and solids handling.

Civiltec will prepare improvement plans that design and engineer the necessary civil, structural, electrical and mechanical elements to incorporate this equipment in the Well No. 12 treatment process with the assumption that the ultimate equipment and media will be selected and determined during the initial design phases. These systems will be incorporated into the mechanical and structural design. Our effort also considers that the system will be supported through operation of backwash supply and recovery systems and that waste generated during backwash will require sampling prior to discharge to the sewer connection. Water

generated during the backwash and rinse process will be clarified in a recovery tank and solids separated from the process will be fluidized and metered to the sewer system. Rinse and backwash water may be recovered and utilized in the treatment process. The primary objective of our design will be to address the following:

- Design of a new connection to the well pump inlet pipeline, treatment plant and new backwash supply pump system. Water will be directed from the well pump to the treatment plant. After treatment the treated water will be conveyed back to the inlet piping of the existing well pipeline and thus discharging to the distribution system. It is desired that all water from Well No. 12 be conveyed to the treatment system which may incorporate an automatic blending system and mixing connecting back into the treated water pipeline. Design will be prepared to achieve 80 percent of the MCL for iron and manganese through use of this blending system which will bypass a portion of the flow around the treatment system and ultimately convey flow to be mixed in the pipeline before the distribution system.
- Review of existing electric load and upgrade service center, if needed. This power supply will be coordinated with new panels provided for the new treatment plant system components in the existing Well No. 12 building as space is available in this area to accommodate circuitry for the new pumping equipment and filtration system. *Civiltec* will prepare the design and coordinate with the City to ensure that the service connection provided for the well is adequate. Included in our efforts, we will perform an analysis of the existing load capacity of the new Motor Control Center to determine if this system can be expanded to accommodate the additional loading from the treatment system and ancillary components.

- Design and engineering of the structural improvements that will support the treatment vessels, reactors (2 tanks conceptualized), filter vessels (2 tanks conceptualized) backwash water tank (1 tank conceptualized) valve trees, piping manifolds, control panels, control panel shade structures, backwash supply pump, wash water rinse recovery pumps and air compressor.
- Design of electrical power facilities that will support operation of the new iron, manganese, and hydrogen sulfide removal system including the systems and instruments identified in the above bullet, control systems, convenience power, grounding building lighting, and site lighting.
- Design of the below and above grade piping manifolds and supports that will convey water to and from the treatment facility, chemical metering solution lines, and above grade air supply piping.
- Design of the final site improvements including the paving, grading, drainage, and demolition of the existing facilities.
- Design of a new liquid chemical system (sodium hypochlorite and sodium bisulfide) that will be placed within a new pre-fabricated building presented as an option. The system will include the chemical

capacity to store a minimum of 2 weeks of chemical under maximum flow conditions.

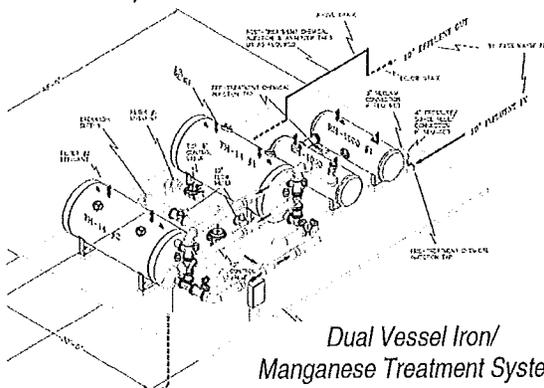

PROJECT MANAGEMENT APPROACH

Civiltec follows a simple four-part philosophy to promote the timely and successful completion of all projects; (1) we do our homework, (2) we listen, (3) we commit the best technical and personnel resources at our disposal, and (4) we communicate.

Our project management style minimizes the need

for amendments to contracts and/or change orders. This process starts with the development of the project understanding and

continues with constant communication throughout the project. Only with a complete understanding of the City's goals, project's requirements, potential utility conflicts, and stakeholders and other agencies' requirements and concerns can we prepare what we believe will be the most efficient and practical work plan. We then design an approach with the best available technical expertise and resources to satisfy the City's goals and bring the project to a timely and successful completion.

Dual Vessel Iron/
 Manganese Treatment System

metering pump to dose bulk sodium hypochlorite to the system and a new chemical storage tank having the adequate

The work plan, possible challenges identified based on our vast experience, and our strategies to mitigate those challenges will be discussed in detail with the City at the beginning of the project. This approach helps to minimize any surprises and allows the project team to respond more quickly and decisively to finding sound and cost effective solutions to challenges, if and when they arise. Our experience to this type of focused and deliberate upfront effort allows the team the opportunity to mitigate potential problems and/or conflicts; saving the City from the extra costs of having to react to conflicts during construction.

Problem Resolution

Civiltec advocates problem resolution through a decision making process based on the consensus of ideas and information from all project team members as a group. This supports the old axiom that two heads are better than one and ensures that sound and intelligent recommendations and solutions are reached and have a better chance for success because they are supported by the involvement of the project team as a whole. Knowledge and communication are the foundation for successful problem avoidance. Understanding the project requirements and identifying potential conflicts and design challenges early in the planning phase, in conjunction with listening to others, utilizing the best available technical expertise, and communicating are the keys to formulating sound and cost effective solutions to design issues associated with any project.

Cost Estimating

Civiltec maintains a comprehensive library of previous project construction costs. The library includes internal and external Engineer's Opinion of Probable Construction Costs for projects. We also utilize recent contractor bid tabulations and the most current Construction Cost publication for estimating unit costs for bid schedule items.

Schedule and Budget Control

Civiltec has resources available to immediately work on this assignment. All assigned tasks will be completed within the fee and on the schedule that are established as a separate document. *Civiltec* will generate written status reports at an appropriate frequency for the project and issue them by fax, e-mail, or in person to discuss, as desired.

On schedule projects will be on
budget projects!

We continually stress that point to our
clients and team members.

Civiltec conducts office staff meetings weekly to review project status and resource utilization. Microsoft Project is used for project scheduling. A detailed Gantt chart schedule is provided in Appendix A.

If selected to design the new pump station facilities, you have our commitment that *Civiltec* will make this the top priority project in the Monrovia office until the project is complete.

Quality Assurance/Quality Control (QA/QC)

Civiltec maintains a robust QA/QC system. Our manual "Engineering and Surveying Design Control Procedures" (EDCP) is customized to fit each project. The EDCP outlines responsibilities and processes to control and verify all surveying, engineering, budgeting and project scheduling requirements. The goal is to produce exceptional, accurate, conforming, compliant, cost effective, quality deliverables as specified in the scope of work and expected by the client.

All design documents, including but not limited to, drawings, sketches, specifications, technical provisions, calculations, studies, etc., are subject to the design control and design review processes outlined in the EDCP. Design inputs, such as applicable municipal, county, state, and Federal codes and standards, contract documents and other applicable quality and technical requirements will be reviewed for applicability and incorporated into design documents.

Our Project Manager will oversee, manage, and implement the QA/QC process and be ultimately responsible for ensuring that each project milestone has been processed in accordance with *Civiltec's* EDCP. At each milestone, the Project Engineer will ensure the submittal meets the scope of work requirements, schedule, and budget. The Project Engineer will provide weekly project updates to the Project Manager. The updates will include project status, comments on scope compliance,

required action items, and updates on schedule and budget. Following review by the Project Manager, weekly project updates can be provided to the City, if desired.

The QA/QC Manager, will work directly under the Project Manager to review all project documentation for conformance with applicable standards, accuracy of information, adequacy and completeness of information and overall quality. The QA/QC review process includes the following.

- The Reviewer will document the review of the check set plans and documents by initialing each sheet followed by the date.
- The Reviewer's comments will be recorded on check set plans and documented in a comment memorandum, if needed, to the Project Manager.
- The Project Manager will review the check set plans and documents with the QA/QC Manager and the Project Engineer to resolve any problems revealed by the review.
- The Project Engineer will submit the original check set plans and documents and corrected plans and documents to the Project Manager for approval.

Upon completion of our internal QA/QC review, the Project Manager will make the project milestone submittal to the City. We request that the City provide review comments to the Project Manager in written form. The Project Manager will meet with the City to review your comments and prepare written responses and resolutions. A copy of the responses and resolutions, as well as the original comments, will be provided with the resubmittal.

SCOPE OF SERVICES

Civiltec's scope of services are arranged into two alternatives. Our basic approach has been identified as Alternative 1 including meeting secondary MCL standards for iron and

manganese considering that no options are needed. *Civiltec* has prepared preliminary concept plans for two alternatives in Appendix B. Corresponding (estimated) sheet counts are included in site plan drawing.

Task 1 -- Preliminary Design Report

Civiltec will prepare a technical report presenting the design basis considering a review of the existing documentation prepared by the City. This memo will include a preliminary layout, design criteria, hydraulic profile, process flow diagram and permitting issues.

- A. Meet with the City management and staff to formalize design criteria, discuss design issues and schedules and obtain available water quality data, CAD files, plans or documents that the City may have in its possession relative to the project.
- B. Perform a complete utility and data research of the site. Our objective is to obtain all record information available for the site including record drawings of the site improvements, boundary information, aerial photographs, vertical and horizontal control, title records, geologic data, and geotechnical report prepared for the site by Ninyo and Moore, etc.
- C. *Civiltec* will establish the control survey points which will consist of locating existing survey monuments and will pick up any relevant features along the way that are not covered in the topography provided by the City. *Civiltec* will establish control throughout the project using established bench mark and centerline tie information as previously established for the site by the City.
- D. Prepare a base map of the site based on a topographic survey performed by *Civiltec* and obtain existing improvements plans from the City in the vicinity of the proposed treatment system pad, to establish horizontal and vertical control for

construction and to supplement record data. Prepare a complete base map of the proposed treatment system site utilizing the survey data and the City record maps.

- E. *Civiltec* will review existing water quality test results and perform applicable General mineral, General Physical, Corrosively/General Mineral, Inorganic Chemical water quality tests. The water quality test would be performed and test results will be compared with previous water quality data. This information will be utilized to conceptualize the water treatment system design.
- F. (*optional – Pilot Testing*) *Civiltec* will perform a pilot test in accordance with the City in developing an analysis of the system suitability. *Civiltec* will utilize the resources and equipment supplied and maintained by Filtronics or similar vendor to perform this element of the effort. Plans to implement a pilot test to determine suitability and optimize the treatment process will be performed by the Vendor. *Civiltec* will support this analysis by summarizing the results of the pilot test for consideration in development of the equipment specification. Vendor will pilot the system utilizing a small reactor and filtration vessels along with necessary chemical dosing system. The testing will involve 1-2 vendor's staff and will take place approximately 3 days on site. *Civiltec* will coordinate with the vendor and the City to determine the location for connection of power and water. The cost for piloting includes generating a test plan and final report, assistance with installation (by the City), operating the equipment during testing, and sample analysis. It is expected that the City's designated laboratory personnel will take split samples and have them analyzed. We believe that the pilot test is not necessary for the ultimate development of the project specification and offers this phase of the effort as an option.
- G. Prepare a site layout showing the treatment system facilities, pump station, disinfection facilities, sodium bisulfide facilities, bypass station including preliminary pad plans and elevations identifying space requirements for the treatment systems, piping and appurtenant improvements. The layouts will also address the need for various site mitigation improvements including preparation of a Standard Urban Water Mitigation Plan and associated permanent best management practices for treatment of site run-off.
- H. Perform a seismic and lateral load analysis of all major pieces of equipment to determine necessary improvements.
- I. We will review the hydraulic capacity of the existing production well and review and analyze the well's ability to deliver the necessary power to the system for conveyance of water through the proposed treatment system to their connection with the distribution system and backwash supply impacts on the existing system if water is to be supplied from the distribution system.
- J. *Civiltec* will solicit cost and performance information from equipment vendors for the treatment systems. *Civiltec* will also perform an analysis and evaluations of manganese treatment equipment systems and improvement alternatives studied and prepare a recommendation for consideration. Ultimately an evaluation will be performed and selection made such that the design is tailored around the selected vendor's treatment solution. Evaluation activities will focus on the following criteria:
- Operability
 - Installation Cost
 - Equipment Cost
 - 20-Year Present Value O&M
 - Experience

- References
 - Warranties
- K. Submit a preliminary design report summarizing the findings of the analysis and discussions performed under this task. We will recommend a final location of the new treatment and pumping systems based upon input from the City. The report will describe the treatment process, design assumptions, operating conditions, water quality information and confirmation of conformance with potable water quality requirements. The report will contain a summary section, conclusions and recommendations along with all of the backup support data and be prepared at 70% and 100% level. We will meet with the City's management and staff to discuss the report, remaining project issues and initiating the design phase.
- L. Project management will be provided for all phases of the design development and will incorporate the preparation of project schedules on a monthly basis are more often as deemed necessary to track progress and achieve successful completion of tasks while staying within budget. Our project management plan consists of identifying project milestones, efficiently navigating through project issues, communicating routinely with the City in meetings and conference calls, and defining objectives for project execution with *Civiltec's* staff. As partners the City and *Civiltec* can achieve the goals established for design completion as expressed in our proposal. We will prepare monthly reports to accompany our invoices along with the schedule. The cost of these efforts are considered in various other tasks of our proposal.

Task 2 – System Final Design

Following the City's approval of the design basis, *Civiltec* will produce plans and specifications for civil, electrical, mechanical, structural, instrumentation, and all other aspects of the project. Prepare final plans and

specifications for site improvements, treatment and process piping systems to be contained on the foundation slab, structural improvements and calculations; all complying with the Preliminary Design Memo and established design criteria. The drawings will be created in AutoCAD 2014 for Windows in Civil3D on 24-inch x 36-inch size sheets. The site design drawings will identify grading, drainage, mechanical, underground piping on the site, and structural improvements necessary for the design effort. *Civiltec* will work with DeltaSE to ensure that all input and output signals for the design are included in the communications and that necessary power is distributed to system components requiring such. Our design includes preparation of a landscape plan if the City requires the plan as part of the permit process.

- A. We propose to provide three submittals for final approval of the plans and specifications. The following list identifies the key submittals, meetings and design information proposed for each phase of the designs:
1. **50% Design.** Submit complete designs and plans, specifications table of contents document. Meet to discuss approximately one week after submittal.
 2. **90% Design.** Submit complete designs and plans, first draft of complete specifications document, a narrative of progress addressing outstanding issues and design completion. Meet to discuss approximately one week after submittal.
 3. **100% Design.** Submit complete drawings and specifications document reflecting 90% design review corrections from the City, LACSD, RWQCB and Division of Drinking Water for final approval by the City. Meet when submitted to expedite approval.

B. **Technical Specifications.** Prepare detailed technical specifications and special provisions to support the drawings and complete the elements of the project. Integrate existing City Standard Specifications and Standard Drawings where applicable. Incorporate latest City front-end contract documents and general provisions. Develop necessary project specific special provisions. Provide a table of contents for the 50% submittal, and technical specifications and special provisions for the 90% and 100% submittals.

C. **Schedule and Opinion of Costs.** Prepare a preliminary construction schedule and an opinion of costs for review and use by the City.

Civiltec will provide completed, original, signed Mylar and original specifications for use by the contractor and the City for the construction of the plant and develop the RFP and construction documents for the City review and approval.

Task 3 – Bidding Services and Selection of Construction Contractor

Civiltec will assist the City in the bidding and award of the contract documents to include:

- Answering contractor's questions
- Issuing addenda
- Attend a pre-bid meeting with potential contractors
- Reviewing the bids/verifying contractor references
- Assisting the City in recommending award of contract

Task 4 – Permitting (Optional-Service)

Permitting. *Civiltec* will issue 90% construction drawings for permitting through the various required agencies. *Civiltec* will submit plans and specifications for review and permitting to the City. We will make the required corrections to the submittal until approval is obtained. The permit plan check fee

is not included in our budget. *Civiltec* will also assist the City with submittal of plans and design memo to DDW. We will provide data to support the City in its efforts to complete the application to amend the permit to operate. The following permits are expected to be pursued for the project:

- Los Angeles County Sanitation District Industrial Waste Discharge Permit.
- Division of Drinking Water Permit Amendment to Operate.

Task 5 – Construction Support (Optional-Services)

A. Attend a preconstruction meeting under supervision of the construction manager. Distribute agenda and minutes to project team.

B. Attend regular teleconference meetings with the City, inspector, contractor and participating outside consultants and agencies.

C. Obtain, manage, and review shop drawings, manufacturer's submittals and safety instructions on each phase of the work. Continually track progress of submittals and approvals to ensure contractual compliance. Monthly report on status of submittals will also be issued.

D. Prepare supplementary sketches and details as required to resolve field construction issues, respond to RFI's, clarification, and changes requested by the City.

E. Arrange and conduct the final observation of work placed into service to be witnessed by the project team. Prepare a "punch list" of all items to be completed by the contractor to obtain final completion and ensure all items are completed.

F. Ensure adequacy of the contractor's as-built drawings and completeness of the drawings. Update the record drawings from field

documentation and issue official as-built drawings to the City.

Cost Proposal

Civiltec proposes to provide our work in accordance with the budget proposal provided via separate cover. Also included under a separate sealed envelope is a man-hour take off and cost estimate, and *Civiltec's* rate schedule that will be in effect through the duration of the project.

Services to be Provided by the City

It is our desire to have the City's staff be available to answer questions during all phases of work and to assist in coordinating the dissemination of the following information during the design of this project:

- A. All available City information and reports for this project, including as-built drawings of existing facilities, and utility locations on the site.
- B. Provision of electronic front end documents including the notice inviting bids, instruction to bidders, bid proposal, contract documents, general provisions and special provisions to be incorporated into the construction documents.
- C. Assemble the bidding document and issue to prospective bidders.
- D. Any additional information residing in the City's records, which the parties agree, may be of assistance during the design process.
- E. If it is determined that potholing of subsurface utilities is needed, the City will obtain a contractor to perform potholing services. *Civiltec* will recommend locations where potholing is required.
- F. Provide timely reviews, plan checks, and needed City information to *Civiltec*, consistent with the approved project schedule.
- G. Apply for and process all required project permits and pay the required permit fees.

Insurance

Civiltec maintains Professional Liability Insurance, General Liability Insurance and Automobile Liability Insurance in the minimum amount of \$1,000,000.00. *Civiltec* also maintains Statutory Workman's Compensation Insurance. Insurance certificate will be provided to City whenever deemed necessary. *Civiltec* has no exception on City's insurance requirement.

Subject: Budget Proposal to Provide Professional Engineering Design Services for Water Treatment System for Water Well No. 12

Dear Mr. Negrete:

Civiltec engineering, inc. (Civiltec) proposes to provide the Scope of Services per our Proposal dated May 12, 2016 for the subject project on a time and material basis not to exceed the following total budget without prior authorization by the City of Santa Fe Springs. The basic budget considers the services to be completed in four phases that includes Preliminary Design Report, System Final Design, Bidding Services and Selection of Construction Contractor, Permitting and Construction Support Services as listed below.

PHASE 1	Preliminary Design Report	\$ 92,970.00
PHASE 2	System Final Design	\$130,110.00
PHASE 3	Bidding Services and Selection of Construction Contractor	\$ 6,760.00
TOTAL BUDGET		\$229,840.00
PHASE 4	Permitting (Optional)	\$ 7,330.00
PHASE 5	Construction Support (Optional)	\$ 44,910.00
TOTAL BUDGET (Including All Options)		\$282,080.00
Deduct Optional Pilot Testing from Phase 1		\$ 15,975.00

Detail break down of these phases are included in project budget analysis work sheet attached herein along with our 2016 Rate Schedule that we propose to keep in place for the project duration. *Civiltec* has not included any permit or plan check fees in the budget.

City of Santa Fe Springs

City Council Meeting

July 28, 2016

PROCLAMATION

Proclamation for National Farmers Market Week

RECOMMENDATION

That the City Council proclaim the week of August 7 – 13, 2016 as “National Farmers Market Week” in Santa Fe Springs.

BACKGROUND

Headed by the United States Department of Agriculture (USDA), National Farmers Market Week celebrates the important role that farmers markets play in local economies. Throughout the week, USDA will celebrate thousands of our nation's farmers markets, the farmers and ranchers who make them possible and the communities that host them. Farmers markets provide consumers with fresh, convenient, and healthy products from local producers. They also play a key role in bringing communities together and connecting cities with the farms. Additionally, more farmers markets, including the Santa Fe Springs Farmers Market, offer customers the opportunity to make purchases with the Supplemental Nutrition Assistance Program.

The Santa Fe Springs Farmers Market has undergone many changes in the last year. The former market's day and time of operation was no longer working in our community. After extensive research, the City entered into a new service agreement with an experienced Farmers Market Manager, Jerry Diaz of Greenleaf Events, to oversee the Farmers Market in Santa Fe Springs. This new seasonal Farmers Market now operates every Wednesday from 5 – 9 p.m. through September 2016. The location has been moved to the Town Center Plaza parking lot near the Aquatics Center. This location is perfect for visibility purposes. It attracts more patrons and captures the participants coming into or out of the Aquatics Center. The new market also features more food vendors, crafters, weekly entertainment, and a children's zone. Since the implementation of the new Market's day/time and location, staff has received positive feedback from the community. The Santa Fe Springs Farmers Market continues to accept Electronic Benefits Transfer (EBT) which makes this convenient for our families in need to purchase their farm-fresh produce.

National Farmers Market Week is from August 7 through 13, 2016; National Farmers Market Week is a great opportunity for our community members to visit the Farmers Market and support the farmers and the tremendous services they provide. Farmers Markets: Preserve America's rural livelihoods and farmland; Stimulate local economies; Increase access to fresh, nutritious food; Support healthy communities; and promote sustainability. The City of Santa Fe Springs, along with Greenleaf Events, will be celebrating our local Farmers Market by hosting special activities at the Market on Wednesday, August 10. Activities will include a Farmers Market

City of Santa Fe Springs

City Council Meeting

July 28, 2016

poster contest, Live Feed on social media, and an "I Love My Farmers Market" photo challenge.

The Mayor may wish to call upon Maritza Sosa-Nieves, Management Assistant to assist with the presentation.

Thaddeus McCormack
City Manager

Attachment

(Proclamation – National Farmers Market Week)

WHEREAS, farmers markets meet consumer demand for a variety of fresh, convenient, and healthy products sold directly from local producers; and

WHEREAS, according to the United States Department of Agriculture, farmers markets preserve America's rural livelihoods and farmland; Stimulate local economies; Increase access to fresh food; Support healthy communities; and promote sustainability; and

WHEREAS, the City of Santa Fe Springs recognizes the countless benefits of the Santa Fe Springs Farmers Market for producers and consumers and is fully committed to supporting the farmers market through technical assistance, staff support, marketing, and more;

WHEREAS, the City of Santa Fe Springs will be joining other municipalities and agencies across America in celebrating Farmers Markets during National Farmers Market Week, and the city wishes to recognize our Farmers Market for the tremendous service they provide to our residents and visitors;

NOW, THEREFORE, be it resolved that I, Richard J. Moore, Mayor of the City of Santa Fe Springs, proclaim August 7 - 13, 2016 as

“National Farmers Market Week”

in Santa Fe Springs and encourage all residents to visit the Santa Fe Springs Farmers Market and purchase your produce from the farmers. Your purchase supports the farmers who make our market possible.

DATED this ____ day of June 2016

Richard J. Moore, MAYOR

ATTEST:

CITY CLERK

PRESENTATION

Recognition of the 2016 Beautification Committee Awards Program Recipients

RECOMMENDATION

That the City Council recognize the 2016 Beautification Committee Awards Program recipients

BACKGROUND

The Beautification Committee which is comprised of residents in the City has toured the community in an effort to locate and recognize homeowners and business owners that exhibit pride in the appearance of their property. This pride is reflected in property improvements and meticulous landscaping. The primary purpose of the Beautification Program is to encourage maintenance of personal and commercial properties in an effort to boost property values throughout the City.

This year, 12 residents and 9 businesses were selected by the Beautification Committee as having met the exceptionally high and demanding standards to receive a Beautification Award. The recipients will receive a plaque with a commemorative photograph of their property, as well as a yard sign to inform neighbors and the public that their house or business is among the most visually appealing and exquisitely maintained properties in the City of Santa Fe Springs and has earned the right to be called a Beautification Award recipient.

The Mayor may wish to call upon Jo Ann Madrid, Community Services Supervisor to assist with the presentation.
